Petroleum Pipelines Public Policy:

The Energy Industry, Organization and Public Policy, 1974 Edward John Mitchell, 1979 Edited proceedings of a conference **Petroleum Pipelines and Public Policy**, 1906-1959 Arthur Menzies Johnson, 1967 Competition and the Regulation of Utilities Michael A. Crew, 2012-12-06 companies to diversify may outweigh the costs of doing so and that some traditional regulatory concerns may be excessively restrictive The papers by Hillman Harris and Jang and Norsworthy while all relating to individual industries have lessons for other regulated industries Hillman's paper Oil Pipeline Rates A Case for Yardstick Regulation deals with the important topic of yardstick regulation for oil pipelines While his application is highly specific the potential application of yardstick regulation goes beyond oil pipelines He reviews the evolution in the law regulating oil pipelines While showing that some progress has been made in introducing economic efficiency considerations into regulation he provides a careful critique of the operation of existing regulation and suggests an alternative based upon a yardstick approach His approach seeks to use competitive market prices as the yardstick with administration of price discrimination limited to dealing with possible favoritism to subsidiaries and affiliates Telecommunications Services as a Strategic Industry Implications for United States Public Policy by Harris and Productivity Growth and Technical Change in the United States Telecommunications Equipment Manufacturing Industries by Jang and Norsworthy provide important insights for telecommunications **Oil Company Ownership of Pipelines** United States. Congress. Senate. Committee on the Judiciary. Subcommittee on Antitrust and Monopoly, 1978 **The development of American petroleum pipelines** Arthur Menzies Johnson, 1956 **Quest for the Golden Circle** Arthur R. Gómez, 2000

Until World War II the Four Corners Region where New Mexico Colorado Utah and Arizona meet was a collection of isolated rural towns In the postwar baby boom era however small communities like Farmington New Mexico became bustling municipalities with rapidly expanding economies In Quest for the Golden Circle Arthur Gomez traces the development of the Four Corners two industries mining and tourism to discover how each contributed to the economic and urban transformation of this region during the 1950s and 1960s Focusing on four cities Durango Colorado Moab Utah Flagstaff Arizona and Farmington New Mexico Gomez chronicles how these towns played key roles in the West's dramatic postwar expansion Cities such as Denver Albuquerque Phoenix Tucson El Paso and Salt Lake City all grew through use of the abundant petroleum uranium natural gas timber and other natural resources extracted from the Four Corners region But the energy boom in these towns was not to last With the arrival of foreign oil bringing economic growth to a halt in the early 1970s town leaders turned again to the land to stimulate their economy This time the resource was a seemingly inexhaustible one tourism Gomez examines how business minded citizens marketed the area's scenic wonders and established the entire region as a tourist destination Their efforts were further assisted by the selection of stunning federal lands Mesa Verde Grand Canyon and Arches National Parks as treasures protected and promoted by the National Park Service Both mining and tourism however

were beset by complex new problems and issues Extensive highways for instance were planned to bisect a Navajo reservation As Gomez illustrates the growing cities in the Four Corners region felt tremendous competing pressures between outside business powers and local needs as their extractive economy boomed and busted and as they then struggled to attract tourism dollars In addition he highlights the prominent roles played by federal agencies like the Atomic Energy Commission and the National Park Service in shaping regional destiny An outstanding analysis of the complexities of postwar development *Quest for the Golden Circle* successfully illuminates the history of one region within the larger story of the modern American West *Monthly Catalog of United States Government Publications*, 1993 *Transportation; Economics and Public Policy* Dudley Frank Pegrum, 1968 **Monthly Catalogue, United States Public Documents**, 1993 *Energy Research Abstracts*, 1980-12 **Regulation of Oil Pipelines by the ICC** William E. Thoms, 1979 **Oil Pipelines of the United States**, 1983 **Bulletin of the Public Affairs Information Service** Public Affairs Information Service, 1980 Public Policies Toward Business Clair Wilcox, 1960 **Public Affairs Information Service Bulletin** Public Affairs Information Service, 1980 Industry Structure, Strategy, and Public Policy Frederic M. Scherer, 1996 Industry Structure Strategy and Public Policy is the result of two decades of the author's successful teaching and classroom experience using a case approach to organization Designed to serve either as a core text or supplemental case book Industry Structure Strategy and Public Policy works to help students learn relevant economic theory through the use of rich real world industries Nine industry case studies integrate theories in industrial organization with historical and statistical information as well as important national and international public policy of problems Scherer clearly demonstrates to the readers the relevancy of issues in industrial organization to the economic and business world within which they work *Public Policy Digest of the National Planning Association*, 1941 **Competition in the Natural Gas Pipeline Industry** Edward C. Gallick, 1993-01-30 This work considers the potential effects of competition in the natural gas pipeline industry Contrary to published studies and government reports this study concludes that federal regulation in the industry is no longer necessary to limit the market power of current pipeline suppliers Rather potential entry by nearby suppliers a competitive factor largely ignored in most economic analyses will promote competition in most major markets The purpose of the work is two fold to quantify the competitive effect of potential market entry by natural gas suppliers and to demonstrate that any industry analysis which fails to consider this competitive factor is likely to be in error This compilation and analysis of market by market data on current deliveries by pipeline location of nearby deliveries and location of nearby pipelines which make no deliveries will be of interest to scholars policymakers and industry analysts concerned with competitive antitrust and regulatory issues
