Phenomenological Approaches To Moral Philosophy:

Phenomenological Approaches to Moral Philosophy J.J. Drummond, Lester Embree, 2013-03-14 Against the background of the recent revival of ethics this handbook aims to show the great fertility of the phenomenological tradition for the study of ethics and moral philosophy by collecting a set of papers on the contributions to ethical thought by major phenomenological thinkers Twenty one chapters in the book are articles by experts who explore the thought of the major ethical thinkers in the first two generations of the phenomenological tradition and direct the reader toward the most relevant primary and secondary materials The final three chapters of the book sketch more recent developments in various parts of the world and the first three chapters investigate the relations between phenomenology and the dominant normative approaches in contemporary moral philosophy

Beyond Certainty Don E. Marietta, 2004-01-01 In *Beyond Certainty* A Phenomenological Approach to Moral Reflection author Don Marietta turns moral reflection on its head A unique study *Beyond Certainty* is a phenomenological approach to the connection between factual knowledge and moral judgment Marietta holds logical certainty to be unnecessary for moral decision making In point of fact logical certainty about our moral judgments according to the author is impossible Key dilemmas in recent moral theory are caught within this impasse represented through an is ought dichotomy Marietta trumps this impasse through a return to concrete reflection on our most primal consciousness of the world He contends that consciousness does not separate out elements of facticity from evaluation and a sense of volition as deductive forms of ethical and moral philosophy have required For him moral reflection which is inimical to decision making becomes the task of justifying the connection between fact moral evaluation and volition in our consciousness of the world Marietta explains this task through a rigorous model requiring intersubjectivity about cultural valuation and experience an exploration of cultural context or subjective imbeddedness of our selves and others in practical life and a critical examination of individual worldviews that enable personal belief and attitudes
