An Alternative History of Hyperactivity Matthew Smith, 2011-07-01 In 1973 San Francisco allergist Ben Feingold created an uproar by claiming that synthetic food additives triggered hyperactivity then the most commonly diagnosed childhood disorder in the United States He contended that the epidemic should not be treated with drugs such as Ritalin but instead with a food additive free diet Parents and the media considered his treatment the Feingold diet a compelling alternative Physicians however were skeptical and designed dozens of trials to challenge the idea The resulting medical opinion was that the diet did not work and it was rejected Matthew Smith asserts that those scientific conclusions were in fact flawed An Alternative History of Hyperactivity explores the origins of the Feingold diet revealing why it became so popular and the ways in which physicians parents and the public made decisions about whether it was a valid treatment for hyperactivity

Arguing that the fate of Feingold's therapy depended more on cultural economic and political factors than on the scientific protocols designed to test it Smith suggests the lessons learned can help resolve medical controversies more effectively

**The Economization of Life** M. Murphy, 2017-05-18 What is a life worth In the wake of eugenics new quantitative racist practices

that valued life for the sake of economic futures flourished In *The Economization of Life* M Murphy provocatively describes the twentieth century rise of infrastructures of calculation and experiment aimed at governing population for the sake of national economy pinpointing the spread of a potent biopolitical logic some must not be born so that others might live more prosperously Resituating the history of postcolonial neoliberal technique in expert circuits between the United States and Bangladesh Murphy traces the methods and imaginaries through which family planning calculated lives not worth living lives not worth saving and lives not worth being born The resulting archive of thick data transmuted into financialized Invest in a Girl campaigns that reframed survival as a question of human capital The book challenges readers to reject the economy as our collective container and to refuse population as a term of reproductive justice *Sick Building Syndrome* Sabah A. Abdul-Wahab, 2011-05-03 This volume throws light on the Sick Building Syndrome in Libraries and other public buildings and the extent to which it is influenced by the internal environment of libraries One of the signs of this disease is that the person suffers from a set of symptoms closely related to his/her presence in the building without the identification of any clear causes and his/her relief of these symptoms when he/she is out of the building Hence the book sheds on the extent to which the interior environment impacts upon the health of the people and the extent to which this is reflected in their performance The book can be used for teaching research and professional reference It concludes with the recommendation that is essential to observe environmental dimensions when designing library and public buildings taking into consideration the expected impact of SBS in library and public buildings on people The significance of the book derives from the fact that it is the first of its kind to examine the issue of the interior environment and SBS of library and public building worldwide
