Grégoire, D. Günther, V. Karanassios, Jean-Michel Mermet, T.J. Wood, 2000 The book starts with a detailed description of ICP MS including quadrupole based sector based and time of flight instruments Instrumentation from existing manufacturers is described and compared to show their similarities and differences Also a review of the ICP MS literature is carried out to outline both the strengths and limitations of the technique whatever its brand as well as what it can currently accomplish in terms of applications Then the book demonstrates how these limitations can be reduced and or eliminated by combining various techniques with ICP MS Great detail is provided on each technique so that the reader can get a good understanding of it before carrying on to the instrumental requirements for its hyphenation to ICP MS and the resulting impact on the operation of the hyphenated instrument Since this book is concerned with the ICP side only which is fairly similar in all the instruments from the different manufacturers the information should be useful to all ICP MS users The features and limitations of each technique are thoroughly discussed and illustrated with a review of the ICP MS literature Approaches which could be used but have not yet been tried with ICP MS are also suggested This is particularly true of flow injection techniques which are extremely flexible and have been used

extensively in atomic spectroscopy and spectrophotometry Many of the features of the technique have not yet been combined to ICP MS and one purpose of the book will be to point out potentially beneficial combinations Exploration for Platinum-group Element Deposits James E.
