**Learning and Teaching Practical Skills** Andrew Armitage, Harriet Harper, 2025-02-28 This book combines the unique and unlikely duo of popular TV shows and pedagogy to help teachers and trainers support their students skills development Aimed at post 16 teachers educators and trainers of all vocational and technical disciplines it encourages readers to relate the examples from popular culture and TV to their teaching toolkit It is aligned to the Occupational Areas 1 8 within the new Diploma in FE and is also suitable for those doing the Apprenticeship in FE teaching The book uses examples from famous reality TV shows to reflect on how people learn practical skills such as baking dancing ice skating sewing and pottery Discussing everyday examples from TV with which readers may be familiar provides an innovative and engaging starting point to explore all aspects of teaching and learning a skill including observation demonstration practice feedback and assessment It encourages readers to think about TV shows such as Masterchef Bake Off and Strictly Come Dancing from the point of view of the teacher The unique mix of seemingly low brow popular culture combined with serious pedagogy offers key insights for learning and teaching including critical discussion of topics such as inclusion and the value of formative feedback Teachers and trainers will develop their own knowledge and skills to support the practical skills development of their students

**Major Trade-Offs** Corey Moss-Pech, 2025-05-06 An eye opening look at the relationship between students majors and their entry level jobs Humanities majors are used to answering the question So what are you going to do with that degree The common misconception is that students in humanities programs don t learn any useful skills for the real world In Major Trade Offs sociologist Corey Moss Pech argues that not only do humanities majors learn real world skills but they actually use them when they graduate Despite this discrepancy graduates with so called practical degrees like business and engineering are much more likely to find employment and they earn higher salaries Why do we belittle a liberal arts education despite the valuable skills that students acquire during their studies Major Trade Offs addresses this question by following students from different majors as they enter the workforce To understand the relationship between majors and entry level jobs Moss Pech conducted nearly 200 interviews with roughly ninety students from four majors at a large Midwestern university engineering business English and communications He follows these students through their senior years chronicling their internships and the support their universities provide in helping them pursue their career paths He found that graduates from practical majors entered the labor market successfully typically through structured internship programs However many ended up in entry level jobs that while well paid were largely clerical and didn t necessarily require a degree to perform On the other hand liberal arts majors rarely accessed structured internships and were largely left to carve out their own paths but did use their degree skills once they secured a job These results challenge popular myths about the marketability of these different majors and offer a new vision for the future of higher education Liberal arts skills are essential in the labor market and yet educators and policymakers still push resources into the practical arts perpetuating the

myth that those majors are more valuable while depriving students of a well rounded education and leaving them no better prepared for the workforce than liberal arts students Of interest to students educators and employers Major Trade Offs calls on colleges and universities to advocate for liberal arts majors leveling the playing field for students as they plan for entry level work
