The development of all major competencies of advanced practice nursing is discussed, direct clinical practice, consultation, coaching, guidance, research, leadership, collaboration and ethical decision making. Advanced practice competencies are discussed in relation to all advanced practice nursing and blended CNS/NP roles, case manager, acute care nurse practitioner, highlighting the shared aims and distinctions of each role. In-depth discussions on educational strategies explain how competencies develop as the nurse's practice progresses. A conceptual framework shows the clear relationship between the competencies, roles and challenges in today's health care environment. Practical strategies are provided for business management, contracting and marketing. Comprehensive information covers the essential competencies of the new Doctor of Nursing Practice degree. More exemplars, case studies provide real-life scenarios showing APN competencies in action.
