Large Parks John Beardsley, 2007-07-26 Publisher description

Learning from Logistics Clare Lyster, 2016-02-22 In the 19th century railroads and canals provided both structure and motor for city development This role has been taken over today by the global flow of data and products as the author argues Flow of material and communication is the DNA of contemporary environments This development has enormous and partially unfathomable implications for our city fabric Logistics networks and their complex structure increasingly bear upon many urban spheres Counter trends to the ubiquitous internet retail trade to name one of the most palpable phenomena are gaining momentum as well exemplified by the criticism of labor conditions in e commerce and the trend to buy regional products from local stores The author describes the current development and its impact on architecture landscape architecture and urbanism Aspects such as today s hypermobility of both products and people have repercussions in design work and create new paradigms for architecture and urban design Concepts for the integration of these new issues are introduced by a number of exemplary urban design projects

Constructing a New Agenda A. Krista Sykes, 2012-03-20 This follow up to Kate Nesbitt s best selling anthology Theorizing a New Agenda collects twenty eight essays that address architecture theory from the mid 1990s where Nesbitt left off through the present Kristin Sykes offers an overview of the myriad approaches and attitudes adopted by architects and architectural theorists during this era Multiple themes including the impact of digital technologies on processes of architectural design production materiality and representation the implications of globalization and networks of information the growing emphasis on sustainable and green architecture and the phenomenon of the starchitect and iconic architecture appear against a background colored by architectural theory as it existed from the 1960s on in a period of transition if not crisis that centers around the perceived

abyss between theory and practice Theory's transitional state persists today rendering its immediate history particularly relevant to contemporary thought and practice While other collections of recent theoretical writings exist none attempt to address the situation as a whole providing in one place key theoretical texts of the past decade and a half This book provides a foundation for ongoing discussions surrounding contemporary architectural thought and practice with iconic essays by Greg Lynn Deborah Berke Sanford Kwinter Samuel Mockbee Stan Allen Rem Koolhaas William Mitchell Anthony Vidler Micahel Hays Reinhold Martin Reiser Umemoto Glenn Murcutt William McDonough Micahael Braungart Michael Speaks and many more
