Regional Development Problems And Policy Measures:

Regional Development Problems and Policy Responses in Five Asian and Pacific Countries Ed. B. Prantilla, 1984

Regional Problems and Policies in Italy and France Kevin Allen, M. C. MacLennan, 2024-11-01 First published in 1970

Regional Problems and Policies in Italy and France examines the problem of regional imbalance in two important countries of Western Europe and emphasizes that policies aimed at promoting regional development must form an integral part of national economic policies. The book is divided into three parts: Part I Regional Problems and Policies in Italy; part II Regional Problems and Policies in France; and part III Regional Policy. Three issues: Part I and II analyze how regional policy in France and Italy has moved away from the public assistance type of intervention into new broader approaches which require reorganization of traditional procedures, change in economic structures, introduction of new products and methods of production, movement of workers between areas and occupations, and shifts in geographical distribution of population and employment. Part III explores regional planning and growth centres or growth areas in the light of French and Italian experiences. It further analyses the regional effects of the EEC and gives a brief account of how British regional problems and policies would be affected by the membership of the Community. This volume is an essential reading for students of Western European governmental policy and the European Economic Community.

Regional Development George Demko, 2017-08-31 Originally published in 1984 This volume brings together papers concerned with the problems of regional development in both Eastern and Western Europe. These include regional economic and social inequalities, lagging and backward regions, and constricted flows of labour. This book provides identification, comparison, analysis, and discussion of regional development problems in Eastern and Western Europe. It discusses the latest trends in regional policy, assesses their effectiveness, and puts forward innovative thinking on the various issues and how they should be tackled in the future.

Policy Integration for Complex Environmental Problems Helen

Briassoulis, 2017-07-05 The quest for policy integration crystallized in the 1990s as awareness was growing that the current supply of narrow sectoral and little coordinated or even overlapping and conflicting policies could not cope efficiently and effectively with contemporary complex cross-cutting and interdependent socio-environmental problems. Combining and coordinating policies properly promises to address this institutional misfit, add value to policies, support planning at national and sub-national levels, and facilitate the transition to sustainable development more generally. This book proposes a comprehensive conceptualization of policy integration and negotiates pertinent theoretical, methodological, and applied issues from the perspective of selected EU policies: rural development, regional development, transport, social, economic, environmental, water resources, and biodiversity policy. Mediterranean desertification, an exceptionally complex socio-

environmental problem is used as an illustrative example as the idea for this book transpired while researching the topic of policy making to combat desertification in the context of MEDACTION an EU funded research project Regional Development and Spatial Planning in an Enlarged European Union Neil Adams,2016-04-01 The expansion of the European Union in 2004 has had significant consequences for both existing and new members of the Union New member states are assimilating into a new institutional and policy framework while the changing geography of Europe provides a different context for policy development in pre 2004 member states One of the more important fields in which these changes are impacting is regional development The admission of the new countries changes patterns of economic and social disparities across the territory of the European Union which in turn demands that existing approaches to regional development are reconsidered An approach which has proved to be one of the most innovative is spatial planning This book brings together a team of academics and policy makers from across the new Europe involved in regional development and spatial planning Providing insights into different approaches it offers a valuable opportunity to compare experiences across European borders
