Reinventing Julia:

Reinventing Julia Muriel Jensen, 2002 **From Reopen to Reinvent** Michael B. Horn, 2022-06-10 A practical blueprint to rebuilding an education system that is no longer working for its students In *From Reopen to Reinvent* distinguished education strategist Michael B Horn delivers a provocative and eye opening call to action for the overthrow of an education system that is not working well for any of its students Grounded in what educators should build in its place to address the challenges that stem from widespread unmet learning needs the book walks readers through the design of a better path forward Using time tested leadership and innovation frameworks like Jobs to Be Done Begin with the End tools of cooperation threat rigidity and discovery driven planning *From Reopen to Reinvent* offers a prescriptive and holistic approach to the purpose of schooling the importance of focusing on mastery for each student and the ideal use of technology It also provides readers with A set of processes and ideals that schools should implement to deal with the challenges they presently face A way to transform threats into opportunities using threat rigidity research A discussion of how the COVID 19 pandemic revealed that schools are not as flexible and equitable as we need them to be Perfect for K 12 educators and parents and school board members involved in the school community *From Reopen to Reinvent* is also an essential resource for professionals working in education related non profits and state education agencies *In Schools We Trust* Deborah Meier, 2014-02-18 We are in an era of radical distrust of public education Increasingly we turn to standardized tests and standardized curricula now adopted by all fifty states as our national surrogates for trust Legendary school founder and reformer Deborah Meier believes fiercely that schools have to win our faith by showing they can do their job But she argues just as fiercely that standardized testing is precisely the wrong way to that end The tests themselves she argues cannot give the results they claim And in the meantime they undermine the kind of education we actually want In this multilayered exploration of trust and schools Meier critiques the ideology of testing and puts forward a different vision forged in the success stories of small public schools she and her colleagues have created in Boston and New York These nationally acclaimed schools are built famously around trusting teachers and students and parents to use their own judgment Meier traces the enormous educational value of trust the crucial and complicated trust between parents and teachers how teachers need to become better judges of each others work how race and class complicate trust at all levels and how we can begin to scale up from the kinds of successes she has created *Reinventing Richard Nixon* Daniel E. Frick, 2008 Examining Nixon s autobiographies and political memorabilia Frick offers far reaching perceptions not only of the man but of Nixon s version of himself contrasted with those who would interpret him differently He cites reinventions of Nixon from the late 1980s particularly the museum at the Richard Nixon Library and Birthplace to demonstrate the resilience of certain national mythic narratives in the face of liberal critiques And he recounts how celebrants at Nixon s state funeral at which Bob Dole s eulogy depicted a God fearing American hero attempted to bury the sources of our divisions over him rendering in some minds the

judgment of redeemed statesman to erase his status as disgraced president With dozens of illustrations Nixon posing with Elvis the National Archives most requested photo Nixonian cultural artifacts classic editorial cartoons no other book collects in one place such varied images of Nixon from so many diverse media These reinforce Frick s probing analysis to help us understand why we disagree about Nixon and why it matters how we resolve our disagreements BOOK JACKET

Norris, 2000-04-26 Reinventing government is a well established political

program that has been pursued in a number of forms throughout the twentieth century. Many of these programs share similar goals of economy and efficacy but they have suffered largely from a persistent inability to achieve their objectives in any significant way. In this timely work Michael Norris perceptively analyzes the reasons for the failure of recent programs to correct the weaknesses of government. He argues that the current reinvention movement has fallen well short of its original goals and demonstrates that the disparity between the original claims of the movement and its results to date has been caused by structural, political, bureaucratic, and internal barriers. Norris meticulously examines each of these barriers, providing new insights and potential solutions to the long-standing problem of government inefficiency. Those with an interest in political science, American government, and public policy will find much to their liking in this thought-provoking volume.
