The Global Perspective of Urban Labor in Mexico City, 1910-1929 Stephan Fender,2019-11-28 The Global Perspective of Urban Labor in Mexico City 1910 1929 examines the global entanglement of the Mexican labor movement during the Mexican Revolution It describes how global influences made their entry into labor culture through the cinema the theater and labor festivals as well as into the development of consumption patterns and advertisement It further shows how the young labor movement constituted its discourse and invented its tradition at meetings and in the columns of newspapers The local conditions constitute the framework for the examination of Mexican labor s perspectives on and engagement with contemporary events of global significance Thereby this book demonstrates how workers turned to the global context in search of guidance and role models embracing global developments and narratives It also reveals the differentiations from this context in order to create a unique local identity This approach allows new perspectives on the role of a neglected revolutionary actor and on the influence of global developments in a revolution that has been predominantly interpreted from a national point of view It shows the way global ideas were brought to life in the framework of revolutionary Mexico City providing new insights into the grand narratives of Globalization and Revolution

Revolution Mark N. Katz, 2001 Although the causes of revolution are often internal the occurrence of revolution has serious international consequences existing alliances are upset the importance of small and weak countries may be magnified and serious efforts may be required to prevent the export of revolutions to other countries Mark N Katz brings together twelve readings from an impressive group of scholars that shed light on this important link between revolution and international relations Katz introduces students to the ways in which revolution has impacted the international system and to key terms so they are better prepared to critically read and analyze the selections that follow A distinctive feature of this collection and one guaranteed to spark lively classroom discussion is the inclusion of contending views in each part that explore a particular issue The readings in Part I for example present differing arguments on why the link between

revolution and international conflict exists or how it occurs The authors excerpted in Part III disagree about the success or failure of democratization as a means to preempt revolution And the final section offers opposing views as to the future impact of revolution on the international system Abundant pedagogy throughout the volume guides students through each reading Both a general and part introductions frame the readings while selection headnotes and critical thinking questions offer background information and underscore important cross cutting themes In addition an annotated list of suggested readings points students toward resources for further study and research Latin American Studies Newsletter ,1981
