**Understanding Research in Personal Relationships** is a comprehensive introduction to the key readings on human and close relationships. Organized into twelve thematic chapters with editorial commentary throughout, the Editors offer a critical reading of the major research articles in the field of relationship studies published in the last few years. Scholarly papers, two per chapter, are presented in an abridged form and critiqued in a carefully structured way that instructs students on the way to read research and to critically evaluate research in this field. The book therefore has a thoroughly didactic focus as the student is given historical, theoretical, and methodological contexts to each article, as well as an explanation of key terms and ideas.
