Relativistic Astrophysics Igor D. Novikov, Ia. B. Zel'dovich, 1978      **Einstein's Field Equations and Their Physical Implications** Bernd G. Schmidt, 2008-01-11 This book serves two purposes The authors present important aspects of modern research on the mathematical structure of Einstein's field equations and they show how to extract their physical content from them by mathematically exact methods The essays are devoted to exact solutions and to the Cauchy problem of the field equations as well as to post Newtonian approximations that have direct physical implications Further topics concern quantum gravity and optics in gravitational fields The book addresses researchers in relativity and differential geometry but can also be used as additional reading material for graduate students      **Neutron Stars 1** P. Haensel, A.Y. Potekhin, D.G. Yakovlev, 2006-11-03 The book gives an extended review of theoretical and observational aspects of neutron star physics With masses comparable to that of the Sun and radii of about ten kilometres neutron stars are the densest stars in the Universe This book describes all layers of neutron stars from the surface to the core with the emphasis on their structure and equation of state Theories of dense matter are reviewed and used to construct neutron star models Hypothetical strange quark stars and possible exotic phases in neutron star cores are also discussed Also covered are the effects of strong magnetic fields in neutron star envelopes      **Stars and Relativity** Ya. B. Zel'dovich, I. D. Novikov, 2014-06-10 Two of the greatest astrophysicists of the 20th century explore general relativity properties of matter under astrophysical conditions stars and stellar systems A valuable resource for physicists astronomers graduate students 1971 edition      Relativistic astrophysics Jakov Borisevič Zel'dovič, I... D. Novikov, 1971      **Nuclear Science Abstracts**, 1967      A Bibliography of Astronomy, 1970-1979 Robert A. Seal, Sarah S. Martin, 1982      **Scientific and Technical Aerospace Reports**, 1975 Lists citations with abstracts for aerospace related reports obtained from world wide sources and announces documents that have recently been entered into the NASA Scientific and Technical Information Database      Soviet Astronomy, 1981      **Progress in Physics, vol. 1/2014** Dmitri Rabounski, Florentin Smarandache, Larissa Borissova, The Journal on Advanced Studies in Theoretical and Experimental Physics including Related Themes from Mathematics      *Naturwissenschaftliche Rundschau*, 1971      **Soviet Astronomy. AJ.**, 1976      **Scientific and Technical Books in Print**, 1972      **Choice** Richard K. Gardner, Phyllis Grumm, 1976      **Classical General Relativity** Subrahmanyan Chandrasekhar, 1993 Because of the vicissitudes of history the general theory of relativity has never been consistently explored to ascertain whether in its realm of exact validity it predicts phenomena which have no counterparts in the Newtonian limit that is in the limit in which the velocity of light may be considered infinite Thus while recent interest in physics has concentrated on such frontier areas as quantum gravity and cosmology there has also been a quiet but steady progress in the classical domain The five papers collected in this volume and presented under the editorship of the famed Nobel Laureate S Chandrasekhar illustrate the nature of these advances Each of them represents developments in areas both of physics and mathematics which disclose

unanticipated findings that illustrate the special character of work in these areas Astrophysicists and mathematical relativists will welcome this unique look at ongoing research      **Mercury** ,1972      *The Fontana History of Astronomy and Cosmology* John David North,1994 The big bang black holes space travel and life in other galaxies this is the stuff of science fiction and the subject of much current speculation and research on the part of astronomers and cosmologists This book shows how man's chronological needs helped scientific developments      **Biulleten'**. **The Science of Soap Films and Soap Bubbles** Cyril Isenberg,1992 Superb treatment of molecular and macroscopic properties of soap films and bubbles emphasizing solutions of physical problems Over 120 black and white illustrations 41 color photographs      **Physics, Uspekhi** ,1999
