It is therefore critical to manage these assets in such a way that they provide a consistent level of service throughout their lifecycle. Management of asset lifecycle however is information intensive and utilises a plethora of information systems. The role of these systems in asset management is much more profound. It extends beyond the organizational boundaries and addresses business relationships with external stakeholders to deliver enhanced level of business outcomes. In doing so, information systems are not only required to translate business strategic considerations into action but are also expected to produce learnings and feedback that informs business strategy and aids in strategic reorientation.

**Air Transport and Operations** Lori Fischer, David Pérez, Kurt Klein, Jacco Hoekstra, P. Roling, 2012-10-15 Air transport must evolve if it is to optimize its value in the 21st century. The mood in the aerospace industry is positive with regard to economic recovery but the focus in this transitional time must be on sustaining value without losing sight of environmental and safety priorities. This book presents the proceedings of the joint conference held in Delft, the Netherlands in June 2012 incorporating the 3rd International Air Transport Operations Symposium, ATOS the 3rd Association of Scientific Development in Air Traffic Management in Europe, ASDA Seminar the 6th International Meeting for Aviation Products Support Processes, IMAPP and the 2012 Complex World Seminar. The conference brought together over 200 participants from industry and academia, all of whom share the common goal of improving performance and capacity by advancing the efficiency, sustainability and safety of air transport. Presentations at the conference were divided equally between academic papers and more applied industry sessions. The book includes the majority of academic papers presented at the conference and provides a wide overview of the issues currently of importance in the world of air transport.
