Fasting works because when you stop eating for a time your body goes into a process called ketosis that has great effects on your body and mind. Though fasting can get more complicated as you hone in on the perfect type of fasting for your body at its base, fasting works off of a really simple idea. When you don't eat, you lose weight, due to how our bodies evolved. Fasting broken down is just a meal timing plan. You simply schedule times where you abstain from food. That's it. Fasting is a period of eating interspersed with periods of not consuming calories. So that is what fasting is in a nutshell. However, looking a little deeper can give you an idea of what intermittent fasting can do for you and some of the things that fasting is not. The craze arising around fasting currently is happening for good reason. Fasting works. It is a long-term solution based on how our bodies evolved and working with our natural systems. If you are looking to lose weight or to gain the cognitive benefits associated with fasting, you may want to dig a little deeper into what intermittent fasting is, how it works, where it comes from, and how you can best reap the benefits.
