

Practical Reality

Halla Kim, Steven Hoeltzel

Practical Reality:

Practical Reality Jonathan Dancy, 2000-08-03 Practical Reality is about the relation between the reason why we do things and the reasons why we should. It maintains that current philosophical orthodoxy bowdlerizes this relation making it impossible to understand how anyone can act for a good reason. In order to understand this Dancy claims we have to abandon current conceptions of the reasons why we act. Our motivating reasons as mental states of ourselves. Belief, desire, explanations of action or purely cognitive accounts in terms of beliefs alone drive too great a wedge between the normative and the motivational. Instead we have to understand a motivating reason as the sort of thing that could be a good reason for instance that the eggs are ready. This rather than my believing that they are ready must be my reason for taking them off the cooker. Most contemporary philosophers think that this view cannot be true. Dancy aims to demonstrate that things can be as he thinks they must be. By giving a fresh account of values and reasons he finds a place for normativity in philosophy of mind and action and strengthens the connection between these areas and ethics.

The Elements of Mentality David Hume, 2003-06-12 In the 18th century David Hume suggested that the science of man psychology was the foundation for all other sciences philosophy. Now a latter day Hume offers a model of mentality that sets psychology and philosophy on common footings eliminating the breach between the sciences and the humanities. From this backdrop the author offers solutions to some of the great questions: the nature of reality, value, certainty, validity, free will, morality and justice.

Kant, Fichte, and the Legacy of Transcendental Idealism Halla Kim, Steven Hoeltzel, 2014-12-18 Kant, Fichte and the Legacy of Transcendental Idealism contains ten new essays by leading and rising scholars from the United States, Europe and Asia who explore the historical development and conceptual contours of Kantian and post Kantian philosophy. The collection begins with a set of comparative essays centered on Kant's transcendental idealism, placing special stress on the essentials of Kant's moral theory, the metaphysical outlook bound up with it and the conception of the legitimate role of religion supported by it. The spotlight then shifts to the post Kantian period in a series of essays exploring a variety of angles on Fichte's pivotal role, his uncompromising constructivism, his overarching conception of the philosophical project and his radical accounts of the nature of reason and the constitution of meaning. In the remaining essays the focus falls on German idealism after Fichte with particular attention to Jacobi's critique of idealism as nihilism, Schelling's development of an idealistic philosophy of nature and Hegel's development of an all encompassing idealistic science of logic. The collection edited by Halla Kim and Steven Hoeltzel will be of great value to scholars interested in Kant, Fichte, German idealism, post Kantian philosophy, European philosophy or the history of ideas.

Pragmatic Naturalism Richard J. Bernstein, 2020-08-18 Richard J. Bernstein argues that despite the apparent chaotic debates about naturalism there has recently been a series of powerful arguments that support a version of naturalism that is in the spirit of John Dewey's pragmatic naturalism. After presenting a sketch of Dewey's pragmatic naturalism he critically examines the works of a variety of thinkers: Robert Brandom, John McDowell, Richard

Rorty Wilfrid Sellars Peter Godfrey Smith Philip Kitcher Bjorn Ramberg David Macarthur Steven Levine Mark Johnson Robert Sinclair Huw Price and Joseph Rouse to show how they have contributed analytic finesse to the articulation of Dewey's vision of pragmatic naturalism As Bernstein shows Dewey's philosophical legacy is very much alive today in some of the best recent philosophic discussions

Wilfrid Sellars Willem A. DeVries, 2014-12-18 Wilfrid Sellars 1912-89 has been called the most profound and systematic epistemological thinker of the twentieth century Robert Brandom He was in many respects ahead of his time and many of his innovations have become widely acknowledged for example his attack on the myth of the given his functionalist treatment of intentional states his proposal that psychological concepts are like theoretical concepts and his suggestion that attributions of knowledge locate the knower in the logical space of reasons However while many philosophers have begun to acknowledge Sellars's inspiration in their work their interpretation of his thought has not always been the most accurate His writings are difficult Individually his essays are complex and sometimes rely on doctrines and arguments he put forward elsewhere Each of his articles is deepened and strengthened by seeing it in its systematic context but he never wrote a unified exposition of his system which therefore has to be pieced together from numerous disparate sources Willem deVries addresses these difficulties specifically and provides a careful reading and remarkable overview of Sellars's systematic philosophy that will become the standard point of reference for all philosophers seeking to understand Sellars's hugely significant body of work
