Regional Development in the USSR--modelling the Formation of Soviet Territorial-production Complexes Mark Konstantinovich Bandman,1985 **Regional Development in Russia** Hans Westlund,Aleksandr Grigor'evich Granberg,Folke Snickars,2000 Ten years ago the former Soviet Union was pictured in the West as a monolithic unit governed from Moscow with a firm hand Today the geographical area which once constituted the USSR no longer exists and the disparities between regions are increasing all the time This is the first book to provide an overview of Russia s regional development during the entire Soviet period as well as presenting a penetrating analysis of the array of regional problems facing Russia as we move into the twenty first century It analyses factors contributing to cohesion and disintegration in Russia today stressing the importance of ethnicity religion and Russian nationalism In examining regional developments and spatial policy during the Soviet period the authors reveal a remarkable paradox that the development of heavy industry actually reduced regional inequalities but as the economy diversified disparities widened The book is also a document from the people who were there that is those trying in the circumstances then prevailing to develop regional science which never achieved practical application under central planning The authors conclude that the development of Russia is increasingly becoming an issue of the development of its regions This book will be useful for academics working in the areas of transitional economics economic geography particularly those interested in long term regional divergence and convergence and economic history **Developpement Regional en USSR** ,1979 **Regional Development: Theory and Practice** Baleshwar Thakur,H.S. Sharma,Suresh Misra,S. Chattopadhyay,Surendra Singh,2017-01-01 The Five Volume Series on Regional Development Theory and Practice is a festschrift dedicated to Professor R P Misra a distinguished scholar widely recognized as one of the pioneers who initiated and promoted Regional Planning studies in India This five volume series with over one hundred research papers on different aspects of regional development is a fitting tribute to the scholar who spent much of his life time thinking researching and writing about development in general and regional development in particular These five volumes each dealing with a specific aspect of regional development Vol 1 Concept of Regional Development Vol 2 Measuring Development Vol 3 Development Patterns and Structures Vol 4 Development Policies and Vol 5 Development Challenges Each of the five volumes begins with an introduction which is unique in the sense that this is not merely an introduction to the contributions contained in the volume but also talks of the theory of regional development contemporary development in the discipline and the contrarian views expressed by various academics and policy makers Another significant aspect of these introductions is the global view and a comparative scenario of the developed developing and under developed economies of the world that the editors have kept in view in a debate seeking an universal theory of regional

development Regions are specifics and often unique and regional development implies focusing on the assets of the territory its potential and constraints *Law And Economic Development In The Soviet Union* Peter B. Maggs,2019-03-04 In the past Soviet policymakers planners and jurists in their enthusiasm for economic and technological development devoted little attention to the often negative consequences of modernization New concerns however have become apparent in recent literature statutes and decrees In this book political scientists and experts on Soviet law address many of those concerns analyzing the legal issues associated with economic modernization in the USSR The central themes of the book are the increasingly centralized nature of the policymaking process in the USSR and Eastern Europe and the marked tendency to rely on law as a principal mechanism for managing the undesirable consequences of scientific and technological progress The authors also assess the impact of the scientific technical revolution on Soviet East European relations and East West relations emphasizing the foreign policy consequences of increased financial and technological interdependence The study does not deal with narrow legalistic issues of technical progress rather its focus on policy questions reflects the inclination of Soviet and Eastern European governments to view those questions in terms of law and legislative activity and to see law as an instrument of social engineering **Planning in the Soviet Union** Judith Pallot,Denis J. B. Shaw,2021-12-24 Originally published in 1981 and based on the authors own research this book provides a comprehensive review of planning in the Soviet Union up until the early 1980s for both geographers and Soviet specialists Planning was particularly important in the Soviet Union since not only most spatial change but all economic planning was the product of a systematic socio political ideology Planning was therefore the key to understanding the Soviet economy society and spatial change When it was first published this was the first study in which the focus had been directed specifically at spatial planning in the Soviet Union in any systematic way **Regional Development** Oksana Dmitrieva,1996 A volume in the Changing Eastern Europe series this account of the long term functioning of an extreme regional policy framework is informed by economic and sociological field studies and statistical analysis by a leading Russian scholar *Soviet Natural Resources in the World Economy* Robert G. Jensen,Theodore Shabad,Arthur W. Wright,1983-08 Russia is a huge storehouse of natural resources including oil gas and other energy sources which she can trade with the rest of the world for advanced technology and wheat In this book leading experts evaluate the Soviet potential in major energy and industrial raw materials giving special attention to implications for the world economy to the end of the twentieth century The authors examine the mineral and forest resources that the Soviet Union has developed and may yet develop to provide exports during the 1980s They discuss the regional dimension of these resources especially in Siberia and the Soviet Far East individual mineral raw materials such as petroleum natural gas timber iron ore manganese and gold and finally the role of raw materials in Soviet foreign trade The authors representing the United States Canada and Great Britain are primarily geographers but they include economists political scientists and a geologist Their work is based on primary sources for most of these reports current information is no longer being released to

researchers and on interviews with Soviet officials Regional Development in the USSR North Atlantic Treaty Organization. Economics Directorate,1979 **The Soviet Regional Dilemma** Jan Ake Dellenbrant,2017-07-05
