

■ **Abstract** — This paper presents a new approach to the design of a fuzzy expert system for the diagnosis of faults in a power transformer. The approach is based on the use of fuzzy logic to model the knowledge of an expert. The system is designed to diagnose faults in a power transformer based on the analysis of the oil sample. The system is designed to be used by a non-expert user. The system is designed to be used by a non-expert user. The system is designed to be used by a non-expert user.
