Cybernetics of Kenyan Running Randall Elam Mayes, 2005 There has been speculation but no definitive answer as to why many of the world's fastest middle and long distance runners are from Kenya Most of the fastest runners in Kenya come from only a few of the 42 tribes and amazingly several sub tribes account for a sizeable portion of those The Kenyans as they are frequently called are not homogenous but have tremendous cultural diversity Peak performance requires unique biological cultural and psychological factors Mayes argues that at this juncture in history Kenyans have the necessary components required to excel in professional running He breaks down each of these components and analyzes them and their interrelationships with other disciplines He also includes external factors such as Westernization globalization and modernization Mayes methodology is unique as he uses a cybernetic model called an ethnosystem With many misunderstandings about how Kenyans see and do things there still remains a great need for education about Kenyan culture A number of disciplines remain fertile areas for discussion in relation to Kenyan running Among those are new science psychological anthropology belief and knowledge systems African philosophy sociobiology and social Darwinism Mayes also addresses hurdles to acquiring the necessary knowledge including taboos religious fundamentalism scientific and institutional dogma and ethnocentrism Jim Fixx's Second Book of Running James F. Fixx, 1980 Presents information and advice on the benefits and techniques of running covering training routines equipment diet marathons and other subjects
