The Handbook for the Future of Work Julie MacLeavy, Frederick Harry Pitts, 2024-12-26 The Handbook for the Future of Work offers a timely and critical analysis of the transformative forces shaping work and employment in the twenty first century. Focusing on the past two decades, the handbook explores how technological advancements, automation and a shifting capitalist landscape have fundamentally reshaped work practices and labour relations. Beyond simply outlining the challenges and opportunities of automation, the handbook integrates these emerging realities with established discussions of work. Importantly, it moves beyond dominant technology-centric narratives, probing into broader questions about the nature of capitalism in a time of crisis and the contestation for alternative economic models. With contributions from established and emerging authors based in institutions around the world, the handbook offers a systematic overview of the developments that have sparked radical shifts in how we live and work and their multifaceted impacts upon social relations and identities, practices and sectors, politics and environments. The handbook is unique in its exploration of the potential for economic transformations to reshape the centrality of work in our social and political imaginaries. A useful resource for students and researchers, the handbook serves as an essential guide to this new intellectual landscape.

Exponential Azeem Azhar, 2021-09-07 The Times and Financial Times Book of the Year. Enticing Sunday Times. Engaging Financial Times. Essential Reid Hoffman. As technology accelerates, the human mind struggles to keep up and our companies, workplaces and democracies get left behind. This is the exponential gap. Now a leading technologist explores how this exponential gap is rewiring our world and reveals how we should respond. The sheer might of technology giants is one of the great challenges of our time. Azeem Azhar's excellent book Exponential offers some solutions. Amol Rajan BBC News. Azhar has a knack for interrogating and inverting conventional thinking. A convincing case that something extraordinary is taking place in business and society. Economist. Deft and clear-eyed. Perhaps Azhar's most valuable insight is that conservatively managing the individual risks posed by new technologies will not suffice. Financial Times. Speaks powerfully about how we need to shape technology to put it back in the service of society. Guardian. Valuable and timely. A diligent and comprehensive definition of a new phase in human affairs. Sunday Times.
