Ritual Of Shame:

Ritual of Shame A. Amory, 1999-01-01 *Ritual of Shame* Aaron Amory, 2004-11-01 *Emotion Rituals* David W. McMillan, 2007-12-11 Cognitive behavior therapy does not typically include the use of emotion in its treatment protocols. *Emotion Rituals* addresses this omission with a thorough discussion of the interplay between thoughts and emotions as vital to the therapeutic process. McMillan's emotion rituals allow clients to apply what they learn in therapy sessions to daily life, fostering continual growth outside of the therapy hour and increasing the effectiveness of each session. McMillan's unique writing style imparts hard facts and theoretical discussion in a conversational tone, presenting new and complicated ideas in a readable and comprehensible manner. Each chapter is devoted to one emotion, and the rituals are suitable for use by both client and therapist, allowing them each to better understand emotion and emotional responses. The result is an accessible and lively text that offers an original approach to healing through feelings. Value and Values Roger T. Ames, Peter D. Herschok, 2015-02-28 The most pressing issues of the twenty-first century—climate change and persistent hunger in a world of food surpluses—to name only two—are not problems that can be solved from within individual disciplines, nation states, or cultural perspectives. They are predicaments that can only be resolved by generating sustained and globally robust coordination across value systems. The scale of the problems and the necessity for coordinated global solutions signal a world historical transit as momentous as the Industrial Revolution: a transition from the predominance of technical knowledge to that of ethical deliberation. This volume brings together leading thinkers from around the world to deliberate on how best to correlate worth, value, with what is worthwhile, values, pairing human prosperity with personal, environmental, and spiritual flourishing in a world of differing visions of what constitutes a moral life. Especially in the aftermath of what is now being called the Great Recession, awareness has mounted of the imperative to question the modern divorce of economics from ethics. While the domains of economics and ethics were from antiquity through at least the eighteenth century understood in many cultures to be coterminous and mutually entailing, the modern assumption has been that the goal of maximizing human prosperity and the aim of justly enhancing our lives as persons and as communities were functionally and practically distinct. Working from a wide array of perspectives, the contributors to this volume offer a set of challenges to the assumed independence of the quantitative and qualitative dimensions of human and planetary well-being. Reflecting on the complex interrelationship among economics, justice, and equity, the book resists one-size-fits-all approaches and struggles to revitalize the marriage of economics and ethics by activating cultural differences as the basis of mutual contribution to shared human flourishing. The publication of this important collection will stimulate or extend critical debates among scholars and students working in a number of disciplines in the social sciences and humanities, including philosophy, history, environmental studies, economics, and law. Contributors: Roger T. Ames, James Behuniak Jr., Steve Bein, Nalini Bhushan, Purushottama Bilimoria, Steven Burik, Amita Chatterjee, Baoyan Cheng, Gordon Davis, Jay L. Garfield, Steven F. Geisz, Peter D. Herschok, Larry A. Hickman.

Placing Nature on the Borders of Religion, Philosophy and Ethics Dr Forrest Clingerman, Mr Mark H Dixon, 2013-06-28 The natural world has been humanized even areas thought to be wilderness bear the marks of human impact But this human impact is not simply physical At the emergence of the environmental movement the focus was on human effects on nature More recently however the complexity of the term nature has led to fruitful debates and the recognition of how human individuals and cultures interpret their environments This book furthers the dialogue on religion ethics and the environment by exploring three interrelated concepts to recreate to replace and to restore Through interdisciplinary dialogue the authors illuminate certain unique dimensions at the crossroads between finding value creating value and reflecting on one's place in the world Each of these terms has diverse religious ethical and scientific connotations Each converges on the ways in which humans both think about and act upon their surroundings And each radically questions the damaging conceptual divisions between nature and culture human and environment and scientific explanation and religious ethical understanding This book self consciously reflects on the intersections of environmental philosophy environmental theology and religion and ecology stressing the importance of how place interprets us and how we interpret place In addition to its contribution to environmental philosophy this work is a unique volume in its serious engagement with theology and religious studies on the issues of ecological restoration and the meaning of place

The Sunflower Forest William R. Jordan, 2012-02-07 Ecological restoration the attempt to guide damaged ecosystems back to a previous usually healthier or more natural condition is rapidly gaining recognition as one of the most promising approaches to conservation In this book William R Jordan III who coined the term restoration ecology and who is widely respected as an intellectual leader in the field outlines a vision for a restoration based environmentalism that has emerged from his work over twenty five years Drawing on a provocative range of thinkers from anthropologists Victor Turner Roy Rappaport and Mary Douglas to literary critics Frederick Turner Leo Marx and R W B Lewis Jordan explores the promise of restoration both as a way of reversing environmental damage and as a context for negotiating our relationship with nature Exploring restoration not only as a technology but also as an experience and a performing art Jordan claims that it is the indispensable key to conservation At the same time he argues restoration is valuable because it provides a context for confronting the most troubling aspects of our relationship with nature For this reason it offers a way past the essentially sentimental idea of nature that environmental thinkers have taken for granted since the time of Emerson and Muir
