Hydrological Drought Lena M. Tallaksen, Henny A.J. van Lanen, 2004 The majority of the examples are taken from regions where the rivers run most of the year

Sustainability Criteria for Water Resource Systems Daniel P. Loucks, John S. Gladwell, 1999-07-15 An international group of experts review guidelines for achieving sustainability in water resource systems

River Restoration Stephen Darby, David Sear, 2008-02-28 River restoration projects are designed to recreate functional characteristics within a context of physical stability They tend to focus on the development and application of geomorphic principles for river restoration design Due to different models obtaining different results on the same problem incomplete or absent data and climatic social cultural changes the designers and managers of such projects frequently face high levels of uncertainty This book will provide a systematic overview of the issues involved in minimizing and coping with uncertainty in river restoration projects A series of thematic sections will be used to define the various sources of uncertainty in restoration projects and how these show at different points in the life cycle design construction and post construction phases of restoration projects The structure of the book will offer a rational theoretical analysis of the problem while providing practical guidance in managing the different sources of uncertainty A wide range of case studies will be included from Europe North America and Australasia

Proceedings International Association of Theoretical and Applied Limnology, 2000

Global Perspectives on River Conservation P. J. Boon, B. R. Davies, Geoffrey E. Petts, 2000-10-03 Throughout the world river conservation is becoming an increasingly important concern In arid regions for instance rivers often form the only water resource for human sustenance indeed the World Bank has predicted that future wars will be about water In many parts of the developing world rivers are used as repositories for waste and river ecosystems consequently reflect the worst excesses of human exploitation In the industrialised nations the focus of attention is beginning to move from chemical clean up to restoring the structural damage to rivers caused by decades of river engineering Recognition is growing that river management needs a catchment wide perspective if the needs of human populations river habitats and wildlife are to reach a sustainable balance The development of river conservation strategies has become a global imperative Global Perspectives on River Conservation is the first book that provides a truly global synthesis of knowledge on river conservation with the aim of encouraging strategic river planning It does this in two ways First it sets out a worldwide region by region overview of the science policy and practice of river conservation Second it provides a topical review of different river settings such as tropical temperate temporary perennial large small and contemporary issues in river conservation such as classification and evaluation environmental legislation the role of public participation Global Perspectives on River Conservation is an invaluable reference for river managers planners and developers conservationists statutory water agencies government departments academics researchers postgraduates and final year under graduates working in the field of environmental management of inland waters

River Channel Restoration Andrew Brookes, F. Douglas Shields, 1996

River Channel Restoration summarises the current state of the art for river channel floodplain and catchment restoration and provides practical guiding principles for river managers Fundamental principles are illustrated with case studies and experiences in a wide range of settings principally Northern Europe and North America An objective is to guide river managers away from trial and error approaches to appraisal and design A multi functional approach to restoration projects is needed encompassing disciplines such as hydrology hydraulics geomorphology water quality ecology and landscape Although concentrating on abiotic factors this book will be of considerable interest to all disciplines with an interest in restoration Contributors include university scientists researchers and practitioners from regulatory and consultancy organisations

Encyclopedia of Hydrological Sciences M. G. Anderson, 2005 *The Protection and Conservation of Water Resources* Hadrian F. Cook, 1998-06-11 This book is about water in Britain It is about resources their conservation protection of water quality for human consumption and aquatic ecosystems Presently there is a struggle to reverse long term trends towards contaminated groundwater polluted rivers and dirty beaches While farmers have to contend with fertiliser controls and sewage undertakings improve treatment industry is now under the most stringent pollution control measures in history Amidst the dash for more dishwashers and washing machines and in a country which prides itself on its gardening we are told the climate is changing and this may put further pressure on resources Meanwhile recent dry winters have compounded long term over abstraction problems reducing river flows and resulting in drought orders Since 1989 there has been privatisation of water and sewage undertakings and the loss of what was once a public service to commercial providers This has proved controversial and anything from low reservoirs to highly paid water executives keeps water in the news year by year There have also been major changes in the environmental regulation of water with the creation of the National Rivers Authority and subsequently the Environment Agency and SEPA for Scotland There is now a relatively stable and regulated provision of water and sewerage services across England Scotland and Wales With the issues such as sustainable development demand management including leakage controls and environmental assessment driving water policy and planning there is a price to pay for investment and this has to be shifted towards the consumer This book explores all these aspects of Britain's water resources providing a comprehensive description of recent policy developments It is written for advanced students of environmental science and policy and for professionals in the water industry and regulatory bodies

International Journal of Biosciences and the Law, 1996 *The Rangeland Journal*, 1998 Knowledge for Sustainable Development Unesco, 2002 **Environmental Monitoring Handbook** Frank R Burden, 2002-06-18 This handbook helps you with the most pervasive activity in environmental science taking and analyzing environmental samples from water air or soil Habitat Conservation A. Warren, J. R. French, 2001-03-30 Habitat Conservation examines the relationship between habitat and ecosystem dynamics Over the last decade scientists have made advances in their understanding of this relationship and this has had major impacts on their approach to nature conservation management In

many habitats conservation management needs to take into account the physical dynamic processes such as the impact of air soil and water as well as the biological processes Covering habitats ranging from mountains to floodplains to coastal dunes and rivers this text discusses how the biological and physical processes interact in each habitat explores the current and future impact of global warming and sea level rise and uses case studies to demonstrate how different habitats can be naturally managed and restored Written by geomorphologists hydrologists climatologists and limnologists this is a fundamental text for masters and undergraduate students studying nature conservation habitat ecology and environmental management It will also be essential reading for all conservationists environmental consultants managers and engineers
