Phantom II:

F-4 Phantom II Society, 2001 **USN McDonnell Douglas F-4 Phantom II** Peter E. Davies, 2016-03-24 Originally designed as a carrier borne long range interceptor armed with radar guided missiles and tasked with defence against missile launching bombers the Phantom II went on to establish itself as one of the most important multi role fighter attack and reconnaissance aircraft of the 20th century Arguably the United States most important aircraft in the Vietnam War where it played the role of workhorse as well as being a deadly MiG interceptor the Phantom was also a mainstay of Atlantic Fleet operations intercepting Soviet bomber and reconnaissance aircraft and turning them away from the carrier groups at the height of the Cold War This book reveals the design and development history of the naval Phantom its variants and the exported designs adopted by other NATO countries Packed with illustrations photographs and first hand accounts it provides a technical history of one of the most famous aircraft ever built **Modelling the F-4 Phantom II** Geoff Coughlin, Neil Ashby, 2012-05-20 The Phabulous Phantom first took to the air on 27 May 1958 and has been in service around the world for many decades The United States the United Kingdom Australia Egypt Germany Greece Iran Israel Japan South Korea Spain and Turkey have all operated this powerful aircraft The Phantom starred in both the Vietnam War and Operation Desert Storm and in its service career has flown every traditional military mission With many F 4 variants in service from FG 1s to Wild Weasels and some 25 scale model kits currently available the possibilities for modelling this subject are endless One of the few guides available on this model this book provides an in depth and step by step approach to modelling this plane across a variety of scales types and national schemes **Engineering the F-4 Phantom II** Glenn E. Bugos, 1996 Conceived in 1953 in a chickenwire covered cubicle known as the advanced design cage at McDonnell Aircraft the F 4 Phantom II fighter bomber was produced for 25 years serving a full workload in Vietnam for the Navy Marines and Air Force and surviving through the 1990s in the air arms of eleven nations While most case studies of modern aircraft focus on the many ways the military industrial complex goes wrong this trenchant invigorating study looks deeper at how those who built the complex intended it to work Step by step the reader discovers how the relationships among parts systems procedures economies and missions were shaped by relationships among people scientists engineers testers program managers subcontractors military strategists pilots and corporate leaders Drawing on exhaustive research including interviews with key players the author makes a major advance in the burgeoning body of literature on technology management by showing how McDonnell worked through the problems of technical integration that plagued defense engineering in the 1960s and 1970s and led to programs full of complexity It is as much a study of how aircraft manufacturers and military officers went about their business as it is a life and times history of an important aircraft *F-4 Phantom II in Action* Larry Davis, 1984 After nearly a decade of self imposed isolation Spinal Tap is back celebrating their long anticipated return with a full length concert comedy video The F-4 Phantom II and the United States Sixth Fleet in the Mediterranean Sea Franz-Josef
