Himmelfmann, Camilla Serck-Hanssen, 2021-11-08 The Proceedings present the contributions to the 13th International Kant Congress which was held at the University of Oslo August 6-9 2019 The congress which hosted speakers from more than thirty countries and five continents was dedicated to the topic of the court of reason The idea that reason stands before itself as a tribunal characterizes the whole of Kant's critical project Without such a court reason falls into conflict with itself With such a court in place however it may succeed in establishing the possibility and limits of metaphysics ethics aesthetics law and science The idea of reason being its own judge is not only pivotal to a proper understanding of Kant's philosophy but can also shed light on the burgeoning fields of meta philosophy and philosophical methodology The 2019 Kant Congress put special emphasis on Kant's methodology his account of conceptual critique and the relevance of his ideas to current issues in especially political philosophy and the philosophy of law Additional sections discussed a wide range of topics in Kant's philosophy The Proceedings will provide anyone who is interested in exploring the variety of present day work on Kant and Kantian themes with a wealth of fruitful inspiration [The World According to Kant](#) Anja Jauernig, 2021-02-18 The world

according to Kant is made up of two levels of reality the transcendental and the empirical The transcendental level is a mind independent level at which things in themselves exist The empirical level is a fully mind dependent level at which appearances exist which are intentional objects of experience The distinction between appearances and things in themselves lies at the heart of Kant's critical philosophy and has been the focus of fierce debate among scholars for over two hundred years Anja Jauernig offers this interpretation of Kant's critical idealism as an ontological position which comprises transcendental idealism empirical realism and a number of other basic ontological theses as developed in the Critique of Pure Reason and associated texts In this interpretation Kant is a genuine idealist about empirical objects empirical minds and space and time Yet in contrast to other intentional objects appearances genuinely exist which is due to both the special

character of experience compared to other kinds of representations such as illusions or dreams and to the grounding of appearances in things themselves This is why Kant can also be considered a genuine realist about empirical objects empirical minds and space and time This book spells out Kant's case for critical idealism thus understood pinpoints the differences between critical idealism and ordinary idealism and clarifies the relation between Kant's conception of things in themselves and the conception of things in themselves by other philosophers in particular Kant's Leibniz Wolffian predecessors

Immanuel Kant's Critique of Pure Reason endeavored to show that the most accurate theory of reality would be one that combined relevant aspects of each position yet transcended both to arrive at a more fundamental metaphysical theory. Kant's synthesis sought to disclose how human reason goes about constructing its experience of the world thus intertwining objective stimuli with rational processes that arrive at an orderly view of nature. **Bacon to Kant** Garrett

Thomson, 2023-02-03 In teaching Modern philosophy the absence of a comprehensive secondary text results in much class time spent on clarifying the ideas of the philosophers leaving little room for philosophical discussion of wider issues. Bacon to Kant was developed as a response to the classroom need to offer undergraduate philosophy students an introduction to the claims and arguments of ten of the most studied Rationalist, Empiricist, and Enlightenment era philosophers: Descartes, Spinoza, Leibniz, Bacon, Hobbes, Locke, Berkeley, Hume, Rousseau, and Kant. The text is designed to be accessible without being philosophically naive. Thomson explains and analyzes central arguments in a readable and engaging style. Critical assessments of evolving views and arguments, contrasting interpretations of original texts, and thought-provoking questions designed to promote lively discussion help students connect the material to broader contemporary philosophical issues.
