**The Question of God in Heidegger's Phenomenology** George Kovacs, 1990-06 Several philosophers have developed theological perspectives out of Heidegger's ontology Yet the question of God in Heidegger's thought itself has never received full elucidation In this revealing new study George Kovacs poses the problem of analyzing the idea of God as a process of questioning and thus subjects Heidegger's phenomenological existentialism to a process of exposition Heidegger himself employed

*Quest for Measure* Raymond E. Gogel, 1987 *Quest for Measure* investigates the problem of truth within the context of German phenomenology After tracing the evolution of the Husserlian concept of truth as evidence the study examines how the untested speculative presuppositions inherent in Husserl's position necessitated a fundamental radicalization of the phenomenological method Heidegger's aletheiological truth concept sought to provide the ontological underpinnings for Husserl's concept of evidence but it too was not without certain speculative presuppositions namely an inexplicit understanding of Being as measure The investigation culminates by unfolding the question of measure as a third dimension of the phenomenological problem of truth

**Apocalyptic Phenomenology** Balázs M. Mezei, 2025-11-28 This book provides a detailed view of the author's conception of apocalyptic phenomenology referring to the revelatory and self-disclosing nature of phenomenological thinking a thinking that is central to our philosophical traditions today The concept of apocalyptic phenomenology i.e. a phenomenological theology that discloses the ultimate ground of being God in the form of divine revelation is original At the same time it is rooted in the phenomenological tradition of *Offenbarung* revelation revealing as the basic feature of phenomena In the author's view reality is self-disclosing apocalyptic and thus he explains the connections between the original biblical notion of apocalypsis and the important developments of our philosophical traditions leading up to the theological turn of phenomenology The chapters are framed around a focus on newness and engage with the work of key thinkers such as Edmund Husserl Martin Heidegger Paul Ricœur Hans Urs von Balthasar and Anton Günther *Apocalyptic Phenomenology* will be of interest to scholars of both theology and philosophy

**Phenomenology and the Problem of Time** Michael R. Kelly,2016-09-15 This book explores the problem of time and immanence for phenomenology in the work of Edmund Husserl Martin Heidegger Maurice Merleau Ponty and Jacques Derrida Detailed readings of immanence in light of the more familiar problems of time consciousness and temporality provide the framework for evaluating both Husserl s efforts to break free of modern philosophy s notions of immanence and the influence Heidegger s criticism of Husserl exercised over Merleau Ponty s and Derrida s alternatives to Husserl s phenomenology Ultimately exploring various notions of intentionality these in depth analyses of immanence and temporality suggest a new perspective on themes central to phenomenology s development as a movement and raise for debate the question of where phenomenology begins and ends

**Heidegger and the Problem of Phenomena** Fredrik Westerlund,2020-02-20 This book offers a broad critical study of Heidegger s lifelong effort to come to

terms with the problem of phenomena and the nature of phenomenology How do we experience beings as meaningful phenomena What does it mean to phenomenologically describe and explicate our experience of phenomena The book is a chronological investigation of how Heidegger's struggle with the problem of phenomena unfolds during the main stages of his philosophical development from the early Freiburg lecture courses 1919/1923 over the Marburg period and the publication of *Being and Time* in 1927 up to his later thinking stretching from the 1930s to the early 1970s A central theme of the book is the tension between on the one hand Heidegger's effort to elaborate Husserl's phenomenological approach by applying it to our pre-theoretical experience of existentially charged phenomena and on the other hand his drive towards a radically historicist form of thinking Heidegger's main critical engagements with Husserl are examined and assessed along the way Besides offering a new comprehensive interpretation of Heidegger's philosophical development the book critically examines the philosophical power and problems of Heidegger's successive attempts to account for the structure of phenomena and the possibility of phenomenology In particular it develops a critique of Heidegger's radical historicism arguing that it ultimately makes Heidegger unable to account either for the truth of our understanding or for the ethical/existential significance of other persons The book also contains a chapter which probes the philosophical commitments that motivate Heidegger's political engagement in National Socialism Issues in Interpretation Theory Pol Vandevelde, 2006

Das Problem des ‚Ur-Ich‘ bei Edmund Husserl Shigeru Taguchi, 2006-09-13 Der späte Husserl spricht von dem Ur-Ich als dem Ich, das der transzendentalen Intersubjektivität in einem gewissen Sinne vorangeht. Dies besagt aber nicht, dass es ein solipsistisches Ich wäre, das dem Anderen einseitig voranginge. Der Terminus Ur-Ich zeigt vielmehr die Ursprünglichkeit einer asymmetrischen und irreversiblen Relation zwischen Ich und Anderem zugespitzt an. Um dies zu zeigen, befragt die vorliegende Untersuchung das erfahrende Bewusstsein in dem das Ich sich selbst in einzigartiger Weise gegeben ist. Diese Selbsterfahrung ist uns im gewöhnlichen Leben allzu selbstverständlich; wir sind uns gewissermaßen allzu nahe. Wenn uns diese selbstverständlich gelebte Vertrautheit mit uns selbst als Ur-Ich als absolutes Medium aller Erfahrung in einer philosophischen Reflexion eigens vor Augen gestellt wird, erscheint sie uns fremdartig. Die vorliegende Arbeit versucht, die Fremdartigkeit des Phänomens des Ur-Ich verständlich zu machen, indem sie erstens Husserls Radikalisierung der Epoché nachvollziehbar macht, indem sie zweitens das Phänomen der intentionalen Modifikation bzw. der ursprünglichen Monadisierung des Ich eingehend analysiert und drittens die Bedeutung der apodiktischen Evidenz aus einer neuen Perspektive herausarbeitet **Husserl's Constitutive Phenomenology** Bob Sandmeyer, 2009-01-11 If Edmund Husserl's true philosophy lay in his unpublished research manuscripts as he argues, then it is in these rather than the introductions and fragmentary studies he published during his lifetime that we may possibly find a systematic of his philosophy. This work constitutes a study of the full range of Husserl's writings with the special task of uncovering there the systematic presentation or presentations of the transcendental phenomenological problematic. Sandmeyer's study contains an overview

of Husserl's total set of writings a translation of Husserl correspondence with Georg Misch a translation of a draft outline of the system of phenomenological philosophy produced by Husserl in collaboration with his assistant Eugen Fink and it also closely traces the influence of Wilhelm Dilthey on Husserl's philosophy

### **The Basic Problems of Phenomenology**

Edmund Husserl, 2006-01-30 This book provides a short introduction to Husserlian Phenomenology by Husserl himself Husserl highly regarded his work The Basic Problems of Phenomenology as basic for his theory of the phenomenological reduction He considered this work as equally fundamental for the theory of empathy and intersubjectivity and for his theory of the life world Further with the appendices it reveals Husserl in a critical dialogue with himself *Max Scheler and Phenomenology* Eugene Kelly, 1977
