Globalization, Philanthropy, and Civil

Society Soma Hewa, Darwin Stapleton, 2005-09-13 Examines complex and diverse links between philanthropy civil society and globalization as a single theme that goes beyond standard economic interpretations Has the potential to generate interest among a wider audience of academics public policy makers and administrators in the field of philanthropy civil society and globalization **Elites and Decolonization in the Twentieth Century** Jost Dülffer, Marc Frey, 2011-04-05

Decolonization changed the spatial order of the globe the imagination of men and women around the world and established images of the globe Both individuals and social groups shaped decolonization itself this volume puts agency squarely at the centre of debate by looking at elites and leaders who changed the course of history across the world A World of

Populations Heinrich Hartmann, Corinna R. Unger, 2014-09-01 Demographic study and the idea of a population was developed and modified over the course of the twentieth century mirroring the political social and cultural situations and aspirations of different societies This growing field adapted itself to specific policy concerns and was therefore never apolitical despite the protestations of practitioners that demography was natural Demographics were transformed into public policies that shaped family planning population growth medical practice and environmental conservation While covering a variety of regions and time periods the essays in this book share an interest in the transnational dynamics of emerging demographic discourses and practices Together they present a global picture of the history of demographic knowledge American Foundations Helmut

K. Anheier, David C. Hammack, 2010-09-01 Foundations play an essential part in the philanthropic activity that defines so much of American life No other nation provides its foundations with so much autonomy and freedom of action as does the United States Liberated both from the daily discipline of the market and from direct control by government American

foundations understandably attract great attention As David Hammack and Helmut Anheier note in this volume Americans have criticized foundations for their alleged conservatism liberalism elitism radicalism devotion to religious tradition hostility to religion in short for commitments to causes whose significance can be measured in part by the controversies they provoke Americans have also criticized foundations for ineffectiveness and even foolishness Their size alone conveys some sense of the significance of American foundations whose assets amounted to over 530 billion in 2008 despite a dramatic decline of almost 22 percent in the previous year And in 2008 foundation grants totaled over 45 billion But what roles have foundations actually played over time and what distinctive roles do they fill today How have they shaped American society how much difference do they make What roles are foundations likely to play in the future This comprehensive volume the product of a three year project supported by the Aspen Institute's program on the Nonprofit Sector and Philanthropy provides the most thorough effort ever to assess the impact and significance of the nation's large foundations In it leading researchers explore how foundations have shaped or failed to shape each of the key fields of foundation work American Foundations takes the reader on a wide ranging tour evaluating foundation efforts in education scientific and medical research health care social welfare international relations arts and culture religion and social change

Arnove, 1982-09-22 Philanthropy and Cultural Imperialism is intended as a source book on the origins workings and consequences of modern general purpose foundations The text encompasses the activities of foundations principally Carnegie Rockefeller and Ford in the production of culture and the formation of public policy Particular attention is given to the policies of the big foundations in the fields of education and social science research The authors write from the perspectives of history sociology comparative education and educational policy studies Their chapters are based on original research While the contributors do not share a uniform ideological framework they do have in common a structural point of view they examine foundations with regard to their functioning in society They analyze the implications of foundations organizational characteristics modus operandi and substantive decisions for social control or social change A distinguishing feature of Philanthropy and Cultural Imperialism is its systematic critical analysis of the sociopolitical consequences of these powerful institutions A central thesis is that foundations like Carnegie Rockefeller and Ford have a corrosive influence on a democratic society they represent relatively unregulated and unaccountable concentrations of power and wealth which buy talent promote causes and in effect establish an agenda of what merits society's attention **Global Citizens in a Borderless World?** Kim DoHyang Reimann, 2002 **Libraries in Africa** Anthony Olden, 1995-11-14 The account of each library reads like an exciting adventure story by showing the relevance of previous undertakings to present day problems Anthony Olden succeeds in bringing the history of libraries back into the mainstream of academic discussion **THIRD WORLD LIBRARIES**
