Mischief Christian Bjone, The Images Publishing Group, 2014-04-04 In the world of modern art the idea of appropriation or the conscious manipulation of the recognised world of another artist has long been accepted as a legitimate strategy in criticism of the tradition of art authorship challenging the context of viewing contemporary work and the manipulation of omnipresent media images The world of art itself is fair game to be pillaged or mined in the production of new art but there is almost no recognised equivalent aesthetic in architecture Philip Johnson consistently dealt with the concept of appropriation and used it as a design strategy from the very beginning of his illustrious career A singular taste maker Philip Johnson influenced art architecture and design during the second half of the 20th century Philip Johnson and His Mischief Appropriation in Art and Architecture looks at the concept of appropriation and how Johnson's style was influenced first by his mentor Mies van der Rohe and then by post modern ideas and artists This title serves to review Johnson's body of work and show that far from being a weakness his use of appropriation was a major part of his innovative success **Philip**

The Architecture of Modern American Synagogues, 1950s-1960s Anat Geva, 2023-12-14 In the aftermath of World War II the United States experienced a rapid expansion of church and synagogue construction as part of a larger religious boom The synagogues built in that era illustrate how their designs pushed the envelope in aesthetics and construction The design of the synagogues departed from traditional concepts embraced modernism and innovations in building technology and evolved beyond the formal rational style of early 1950s modern architecture to more of an expressionistic design The latter resulted in abstraction of architectural forms and details and the inclusion of Jewish art in the new synagogues The Architecture of Modern American Synagogues 1950s 1960s introduces an architectural analysis of selected modern American synagogues and reveals how they express American Jewry's resilience in continuing their physical and spiritual identity while embracing modernism American values and landscape In addition the book contributes to the discourse on preserving the recent past e g mid 20th century architecture While most of the investigations on that topic deal with the brick mortar challenges this book introduces preservation issues as a function of changes in demographics in faith rituals in building codes and in energy conservation As an introduction or a reexamination The Architecture of Modern American Synagogues 1950s 1960s offers a fresh perspective on an important moment in American Jewish society and culture as reflected in their houses of worship and adds to the literature on modern American sacred architecture The book may appeal to Jewish congregations architects preservationists scholars and students in fields of studies such as architectural design sacred architecture American modern architecture and building technology Post WWII religious and Jewish studies and preservation and conservation **Philip Johnson**, 1966 **The Dissolution of Place** Shelton Waldrep, 2016-03-16 Postmodern architecture with its return to ornamentality historical quotation and low culture kitsch has long been seen as a critical and popular anodyne to the worst

aspects of modernist architecture glass boxes built in urban locales as so many interchangeable generic anti architectural cubes and slabs This book extends this debate beyond the modernist postmodernist rivalry to situate postmodernism as an already superseded concept that has been upended by deconstructionist and virtual architecture as well as the continued turn toward the use of theming in much new public and corporate space It investigates architecture on the margins of postmodernism those places where both architecture and postmodernism begin to break down and to reveal new forms and new relationships The book examines in detail not only a wide range of architectural phenomena such as theme parks casinos specific modernist and postmodernist buildings but also interrogates architecture in relation to identity specifically Native American and gay male identities as they are reflected in new notions of the built environment In dealing specifically with the intersection between postmodern architecture and virtual and filmic definitions of space as well as with theming and gender and racial identities this book provides provides ground breaking insights not only into postmodern architecture but into spatial thinking in general

Philip Johnson John M. Jacobus, Philip Johnson, 1963 *Machine Art, 1934* Jennifer Jane Marshall, 2019-01-23 In 1934 New York's Museum of Modern Art staged a major exhibition of ball bearings airplane propellers pots and pans cocktail tumblers petri dishes protractors and other machine parts and products The exhibition titled *Machine Art* explored these ordinary objects as works of modern art teaching museumgoers about the nature of beauty and value in the era of mass production Telling the story of this extraordinarily popular but controversial show Jennifer Jane Marshall examines its history and the relationship between the museum's director Alfred H Barr Jr and its curator Philip Johnson who oversaw it She situates the show within the tumultuous climate of the interwar period and the Great Depression considering how these unadorned objects served as a response to timely debates over photography abstract art the end of the American gold standard and John Dewey's insight that how a person experiences things depends on the context in which they are encountered An engaging investigation of interwar American modernism *Machine Art 1934* reveals how even simple things can serve as a defense against uncertainty
