Rettungsgesetz Nordrhein-Westfalen Dorothea Prütting, 2016-09-14 Mit der Novellierung des Rettungsgesetzes 2015 wurde die gesetzliche Grundkonzeption von 1992 bestätigt und die Trennung von Notfallrettung und Krankentransport belassen. Zur besseren Umsetzung beider Angebote sind geeignete Möglichkeiten der Zusammenarbeit z.B. in einer gemeinsamen Leitstelle eingeführt worden. Erhebliche Auswirkungen auf den Rettungsdienst waren durch die Modernisierung des Vergaberechts erwartet worden. Der Gesetzgeber wurde den besonderen Belangen des Rettungsdienstes gerecht, ohne zu verkennen, dass die Gebote der Wirtschaftlichkeit und des Wettbewerbs auch in diesem Bereich zu beachten sind. Die verbesserte Erstversorgung am Notfallort durch das neue Berufsbild der Notfallsanitäterinnen und Sanitäter korrespondiert mit den Bemühungen um eine immer weiter steigende Qualität der Versorgung, die auch durch die gesetzliche Fixierung der ärztlichen Leitung des Rettungsdienstes akzentuiert erfahren hat. Die Ausbildungsfinanzierung des neuen Berufs wurde geregelt. Mit dem Kommentar sind insbesondere die kommunalen Aufgabenträger, die freiwilligen Hilfsorganisationen, Krankentransportunternehmen sowie die Berufsgruppen der Notfallsanitäterinnen und Sanitäter der Rettungsassistentinnen und Assistenten der Rettungsanitäterinnen und Sanitäter der Krankenhäuser sowie die ärztlichen Beschäftigten in der ärztlichen Tätigkeit angesprochen.

Foundations of Deductive Databases and Logic Programming Jack Minker, 2014-05-12

Foundations of Deductive Databases and Logic Programming focuses on the foundational issues concerning deductive databases and logic programming. The selection first elaborates on negation in logic programming and towards a theory of declarative knowledge. Discussions focus on model theory of stratified programs, fixed point theory of nonmonotonic operators, stratified programs semantics for negation in terms of special classes of models, relation between closed world assumption and the completed database, negation as a failure and closed world assumption. The book then takes a look at negation as failure using tight derivations for general logic programs, declarative semantics of logic programs with negation and declarative semantics of deductive databases and logic programs. The publication tackles converting AND control to OR control by program transformation, optimizing dialog equivalences of logic programs, unification and logic programming and parallel complexity. Topics include parallelism and structured and unstructured data, parallel algorithms and complexity solving equations, most general unifiers, systems of equations and inequations, equivalences of logic programs and optimizing recursive programs. The selection is a valuable source of data for researchers interested in pursuing further studies on the foundations of deductive databases and logic programming.

Human Health Engineering Jean-Marie Aerts, 2020-03-12 In this Special Issue on human health engineering we invited submissions exploring recent contributions to the field of human health engineering which is the technology used for monitoring the physical or mental health status of individuals in a variety of applications Contributions focused on sensors wearable hardware algorithms or integrated monitoring systems We organized the different papers according to their contributions to the main aspects of the monitoring and control engineering scheme applied to human health applications including papers focusing on measuring sensing physiological variables contributions describing research on the modelling of biological signals papers highlighting health monitoring applications and finally examples of control applications for human health In comparison to biomedical engineering the field of human health engineering also covers applications on healthy humans e.g. sports sleep and stress and thus not only contributes to develop technology for curing patients or supporting chronically ill people but also more generally for disease prevention and optimizing human well being
