Veterinary Drug Manufacturing Encyclopedia Marshall Sittig,1981 Managing Discovery in the Life Sciences Philip A. Rea,Mark V. Pauly,Lawton R. Burns,2018-02-01 In this book distinguished scholars Philip A Rea Mark V Pauly and Lawton R Burns explore the science and management behind marketable biomedical innovations They look at how the science actually played out through the interplay of personalities the cultures within and between academic and corporate entities and the significance of serendipity not as a mysterious phenomenon but one intrinsic to the successes and failures of the experimental approach With newly aggregated data and case studies they consider the fundamental economic underpinnings of investor driven discovery management not as an obstacle or deficiency as its critics would contend or as something beyond reproach as some of its proponents might claim but as the only means by which scientists and managers can navigate the unknowable to discover new products and decide how to sell them so as to maximize the likelihood of establishing a sustainable pipeline for still more marketable biomedical innovations Pharmaceutical Manufacturing Encyclopedia, 3rd Edition William Andrew Publishing,2013-10-22 This industry standard encyclopedia on pharmaceutical manufacturing processes has been completely updated to include FDA drugs approved up to the summer of 2004 The encyclopedia gives details for the manufacture of 2226 pharmaceuticals that are being marketed as a trade named product somewhere in the world Each entry includes Therapeutic function Chemical and common name Structural Formula Chemical Abstracts Registry no Trade name manufacturer country and year introduced Raw Materials Manufacturing Process In addition references are also cited under each drug s entry to major pharmaceutical works where additional information can be obtained on synthesis and the pharmacology of the individual products **Encyclopedia of Pharmaceutical Technology** James Swarbrick,James C. Drug Repurposing David Cavalla,2022-02-09 Drug repurposing is the development of existing drugs for new uses given

that 9 in 10 drugs that enter drug development are never marketed and therefore represent wasted effort it is an attractive as well as inherently more efficient process Three repurposed drugs can be brought to market for the same cost as one new chemical entity and they can also be identified more quickly an important benefit for patients whose diseases are progressing faster than therapeutic innovation But repurposing also requires a fresh look at configuring pharmaceutical R a holistic gedanken experiment almost needs to be undertaken at the very start of any repurposing development In addition to new ways of thinking the discovery of repurposing opportunities can take advantage of artificial intelligence techniques to match the perfect new use for an existing drug And while repurposing of medicines has been in the mind of every doctor since Hypocrates modern clinical practice will simply have to adapt to new repurposing techniques in an age where the number of known diseases is increasing much faster than the healthcare dollars available
