Pharmaceutical Technology Assessment For Managed C:

Market Access Management für Pharma- und Medizinprodukte Ralph Tunder, 2020-06-16 Die pharmazeutische Industrie steht im deutschen Gesundheitswesen häufig im Mittelpunkt kontroverser Kostendiskussionen. Als Resultat zielten die Maßnahmen der Gesundheitspolitik in den letzten Jahren vorrangig auf Kostenregulierungen der Arzneimittelindustrie ab, deren bisheriger Höhepunkt die Einführung des AMNOG im Jahr 2011 darstellte. Die bis dato freie Preisbildung wurde abgelöst durch ein zweistufiges Verfahren bestehend aus Nutzenbewertung und Preisverhandlung. Diese gravierenden Veränderungen der gesetzlichen Rahmenbedingungen für die Arzneimittelindustrie hatten einen erheblichen Bedeutungszuwachs des Themas Market Access zur Folge. Die Motivation zur Erstellung des Buches ist es, eine Publikation zu schaffen, die nicht nur den aktuellen Status widerspiegelt, sondern vielmehr auch die wesentlichen Instrumente und Verfahrensweisen aufzeigt und auch kritisch hinterfragt. Der Leser soll so einen Einblick in die Materie, als auch ein richtiges Rüstzeug bei der konkreten Umsetzung erlangen. Das Buch dient dazu, Market Access Managern oder Interessierten fundiertes Hintergrundwissen zu vermitteln.

Introduction to Market Access for Pharmaceuticals Mondher Toumi, 2017-01-12 Market access is the fourth hurdle in the drug development process and the primary driver for global income of any new drug. Without a strategy in place for pricing, showing value for effectiveness and an understanding of the target purchaser's needs, the drug will fail to reach its intended market value. *Introduction to Market Access for Pharmaceuticals* is based on an accredited course in this area taken from the European Market Access University Diploma (EMAUD) and is affiliated with Aix-Marseille University. Key Features: The first guide to market access for pharmaceuticals based on tested teaching materials. Addresses both pharmaceutical and vaccine products. Includes case studies and scenarios. Covers market access considerations for Western Europe, the USA, Japan and China. Explains the impact the changing healthcare market will have on your product.

Engineering Management Fausto Pedro García Márquez, Benjamin Lev, 2013-03-06 The *Engineering Management* book synthesises the engineering principles with business practice, i.e. the book provides an interface between the main disciplines of engineering technology and the organizational, administrative and planning abilities of management. It is complementary to other sub-disciplines such as economics, finance, marketing, decision and risk analysis, etc. This book is intended for engineers, economists and researchers who are developing new advances in engineering management or who employ the engineering management discipline as part of their work. The authors of this volume describe their pioneering work in the area or provide material for case studies successfully applying the engineering management discipline in real-life cases.

Pharmaceutical Technology Assessment for Managed Care Samuel A. Bozzette, 2001 Increasingly powerful pharmaceuticals are of increasing clinical and economic importance to managed care organizations Expenditures on pharmaceuticals have also been increasing a trend driven by a number of factors including the accelerating development of more innovative and more expensive agents rising pharmaceutical prices and higher utilization due to the aging of the population direct to consumer advertising and other factors More often today health plans and provider organizations are responsible for managing and paying for these cost increases which creates an incentive for them to go beyond a focus on clinical effectiveness and safety to evaluate the cost effectiveness of new drugs In addition the development of drug formularies and the current focus on best practices require that each new drug be assessed relative to available alternatives The formal controls and guidelines resulting from managed care processes can increase quality and cost efficiency but can also be a barrier to desirable innovations Together these developments have caused managed care organizations to realize that making good decisions on new pharmaceuticals is to their immediate financial and clinical benefit Accordingly many have expressed interest in improving their ability to evaluate new pharmaceuticals
