**Truth, Lies, and O-Rings** Allan J McDonald, 2012-03-11 On a cold January morning in 1986 NASA launched the Space Shuttle Challenger despite warnings against doing so by many individuals including Allan McDonald The fiery destruction of Challenger on live television moments after launch remains an indelible image in the nation's collective memory In *Truth Lies and O Rings* McDonald a skilled engineer and executive relives the tragedy from where he stood at Launch Control Center As he fought to draw attention to the real reasons behind the disaster he was the only one targeted for retribution by both NASA and his employer Morton Thiokol Inc makers of the shuttle's solid rocket boosters In this whistle blowing yet rigorous and fair minded book McDonald with the assistance of internationally distinguished aerospace historian James R Hansen addresses all of the factors that led to the accident some of which were never included in NASA's Failure Team report submitted to the Presidential Commission *Truth Lies and O Rings* is the first look at the Challenger tragedy and its aftermath from someone who was on the inside recognized the potential disaster and tried to prevent it It also addresses the early warnings of very severe debris issues from the first two post Challenger flights which ultimately resulted in the loss of Columbia some fifteen years later *National Aeronautics and Space Administration (NASA)* C. *Don't Tell the Boss!* Dmitry Chernov, Didier Sornette, Giovanni Sansavini, Ali Ayoub, 2023-01-20 After a major disaster when investigators are piecing together the story of what happened a striking fact often emerges before disaster struck some people in the organization involved were aware of dangerous conditions that had the potential to escalate to a critical level But for a variety of reasons this crucial information did not reach decision makers So the organization moved ever closer to catastrophe effectively unaware of the possible threat despite the fact that some of its employees could see it coming What is the problem with communication about risk in an organization and why does this problem exist What stops people in organizations or project teams from freely reporting and discussing critical risks This book seeks to answer these questions starting from a deep analysis of 20 disasters where the concealment of risks played a major part These case studies are drawn from around the world and span a range of industries civil nuclear power coal oil and gas production hydropower energy metals and mining space exploration transport finance retail manufacturing and even the response of governments to

wars famines and epidemics Together case studies give an insight into why people hesitate to report risks and even when they do why their superiors often prefer to ignore the news The book reviews existing research on the challenges of voice and silence in organizations This helps to explain more generally why people dread passing on bad news to others and why in the workplace they prefer to keep quiet about unpleasant facts or potential risks when they are talking to superiors and colleagues The discussion section of the book includes important examples of concealment within the Chinese state hierarchy as well as by leading epidemiologists and governments in the West during the novel coronavirus outbreak in Wuhan in 2019-2020 The full picture of the very early stage of the COVID 19 pandemic remains unclear and further research is obviously needed to better understand what motivated some municipal provincial and national officials in China as well as Western counterparts to obfuscate facts in their internal communications about many issues associated with the outbreak

NASA 50th Anniversary Proceedings: NASA's First 50 Years: Historical Perspectives Steven J. Dick, National Aeronautics and Space Administration, 2010-07-07 On 29 July 1958 President Dwight D Eisenhower signed the National Aeronautics and Space Act creating the National Aeronautics and Space Administration NASA which became operational on 1 October of that year Over the next 50 years NASA achieved a set of spectacular feats ranging from advancing the well established field of aeronautics to pioneering the new fields of Earth and space science and human spaceflight In the midst of the geopolitical context of the Cold War 12 Americans walked on the Moon arriving in peace for all mankind Humans saw their home planet from a new perspective with unforgettable Apollo images of Earthrise and the Blue Marble as well as the pale blue dot from the edge of the solar system A flotilla of spacecraft has studied Earth while other spacecraft have probed the depths of the solar system and the universe beyond In the 1980s the evolution of aeronautics gave us the first winged human spacecraft the Space Shuttle and the International Space Station stands as a symbol of human cooperation in space as well as a possible way station to the stars With the Apollo fire and two Space Shuttle accidents NASA has also seen the depths of tragedy In this volume a wide array of scholars turn a critical eye toward NASA's first 50 years probing an institution widely seen as the premier agency for exploration in the world carrying on a long tradition of exploration by the United States and the human species in general Fifty years after its founding NASA finds itself at a crossroads that historical perspectives can only help to illuminate

Dunar, 1998      **Lady Astronauts, Lady Engineers, and Naked Ladies** Karin Hilck, 2019-07-08 The book *Lady Astronauts Lady Engineers and Naked Ladies* is a gender history of the American space community and by extension a social history of American society in the twentieth century during the Cold War In order to expand and differentiate the prevalent postwar narrative about gender relations and cultural structures in the United States the book analyzes several different groups of women interacting in different social spaces within the space community It therewith grants insight into the several layers of female participation and agency in the community and the gender and race based obstacles and hurdles the female prospective astronauts scientists engineers artists administrators writers hostesses secretaries and wives were faced with at NASA and in the space industry In each chapter a different social space within the space community is analyzed The spaces where the women lived and worked are researched from a media individual and institutional angle ultimately revealing the differing gender philosophies communicated in the public sphere and the space community workplaces by government and space community officials While women were publicly encouraged to participate in the American space effort to beat the Soviet Union in the race to the moon women had to deal with gender based barriers which were integral to the structures of the space community just as they were an intrinsic component of all societal structures in the United States in the 1960s The female space workers who were often perceived as disrupters of the prevalent social order in the space community and discriminated by some of their male colleagues and bosses on a personal basis still managed to assert themselves They molded pockets of agency in the space community workspaces without the facilitation of regulations on the part of NASA that might have provided them with easier access or more agency Thus the space community a place of technological innovation was not necessarily also a place of social innovation but a community with a government agency at its center that mainly mirrored the current changing social order conventions and policies in the 1960s as well as in the 1970s and 1980s Nevertheless the women presented in this book were instrumental in advancing and consolidating the social transformation that happened within the space community and the United States and therefore make intriguing subjects of research Thus this systematic analysis of the connection between gender space and the Cold War adds a new dimension to space history as well as expands the discourse in American history about gender relations and the opportunities of women in the twentieth century      **Power to Explore, A History Of Marshall Space Flight Center, 1960-1990, NASA SP-4313, 1999** United

Waring,National Aeronautics and Space Administration (NASA),2017-05-10 This official NASA history report provides a comprehensive history of the Marshall Space Flight Center MSFC in Huntsville Alabama from its formation through 1990 covering the von Braun era the Apollo moon landing program and the Saturn rockets including the incredibly successful Saturn V moon rocket Space Shuttle development the Challenger disaster in 1986 and the subsequent recovery Spacelab Hubble Space Telescope and the early days of the Space Station program which would become the ISS This is an engaging and somewhat opinionated view of these crucial space efforts providing a unique perspective from those at the Marshall center Contents Chapter 1 Origins of Marshall Space Flight Center Chapter 2 The Center in the Saturn Years Culture Choice and Change Chapter 3 Crafting Rockets and Rovers Apollo Engineering Achievements Chapter 4 The Marshall Reconstruction Chapter 5 Between a Rocket and a Hard Place Transformation in a Time of Austerity Chapter 6 Skylab Competition and Cooperation in Human Systems Chapter 7 Beyond The Gate of Heaven Marshall Diversifies Chapter 8 The Space Shuttle Development of a New Transportation System Chapter 9 The Challenger Accident Chapter 10 The Recovery Investigation and Return to Flight Chapter 11 Spacelab International Cooperation in Orbit Chapter 12 The Hubble Space Telescope Chapter 13 Space Station A Visionary Program in a Pragmatic Era Chapter 14 Conclusion 1960 1990 From the Introduction A broad approach to the Center s history is necessary because Marshall has always been complex even enigmatic In six years of research we have talked to people at Marshall and elsewhere in NASA and have heard interpretations of the Center that are often strikingly contradictory Some outsiders criticize Marshall as having a closed culture impervious to penetration from the outside most Marshall veterans see their Center as open seeking interaction with other groups at every opportunity Outsiders sometimes describe Marshall s management as authoritarian insiders typically see top officials as responsive to ideas from lower ranking experts Some see Marshall s history as a prosaic tale of bureaucratic growth and inertia common to NASA others see a story of unique organizational culture Howard McCurdy s recent book Inside NASA examines NASA s evolution and shows how early dynamism fell victim to increasingly complex limitations and tightening budgets Not surprisingly many of his interviewees were Marshall veterans Yet Marshall s team of German rocket experts and American engineers was unique in the annals of space pioneering and the Center s first 30 years led to space science and engineering achievements of unparalleled breadth Marshall has been at the forefront of the frontier of space but it has also been a center of controversy In its first three decades NASA had three major crises the Apollo fire in 1967 the Challenger disaster in 1986 and a crisis of confidence in the late 1980s in which initial shortcomings of the Hubble Space Telescope and questions about Space Station planning and funding focused national attention on NASA s uncertain future Marshall was at the margins of the Apollo fire

investigation but at the center of the crises of the 1980s      *Scientific and Technical Books and Serials in Print* ,1984
