Power To The People Energy And The Cuban Nuclear Program:

Power to the People Jonathan Benjamin-Alvarado, 2000 Why would Cuba an isolated and impoverished country be trying to develop a nuclear energy capability and why would it attempt to expand its energy generation capability when it can barely feed its population This book seeks to clarify the risks and opportunities associated with the development and expansion of the Cuban energy sector Once reliant on imported fossil fuels as well as Russia s willingness to underwrite its energy development schemes post Cold War Cuba is now confronted with the daunting tasks of expanding its energy capabilities while simultaneously replacing its energy infrastructure Drawing on extensive fieldwork in Cuba this book looks in depth at the economic social and political implications of what is rapidly becoming one of the next century s most important public policy issues in Cuba Publisher description
