Plato and the Power of Images ,2017-07-20 Plato is well known both for the harsh condemnations of images and image making poets that appear in his dialogues and for the vivid and intense imagery that he himself uses in his matchless prose Through their resemblance to true reality images have the power to move their viewers to action and to change themselves but because of their distance from true reality that power always remains problematic Two recurrent problems addressed here are how an image resembles what it represents and how to avoid mistaking that image for what it represents *Plato and the Power of Images* comprises twelve chapters on the ways Plato has used images and the ways we could or should understand their status as images

Image and Myth Luca Giuliani,2013-09-11 On museum visits we pass by beautiful well preserved vases from ancient Greece but how often do we understand what the images on them depict In *Image and Myth* Luca Giuliani tells the stories behind the pictures exploring how artists of antiquity had to determine which motifs or historical and mythic events to use to tell an underlying story while also keeping in mind the tastes and expectations of paying clients Covering the range of Greek style and its growth between the early Archaic and Hellenistic periods Giuliani describes the intellectual social and artistic contexts in which the images were created He reveals that developments in Greek vase painting were driven as much by the times as they were by tradition the better known the story the less leeway the artists had in interpreting it As literary culture transformed from an oral tradition in which stories were always in flux to the stability of written texts the images produced by artists eventually became nothing more than illustrations of canonical works At once a work of cultural and art history *Image and Myth* builds a new way of understanding the visual culture of ancient Greece

Picture Pedagogy Paul Duncum,2020-05-14 Contemporary societies are saturated with pictures They are globally a part of everyday life and they are seductive offering values and beliefs in such highly pleasurable forms that it is often difficult to resist their power to persuade Yet interpreting pictures is largely neglected in schools *Picture Pedagogy* addresses this head on showing that pictures can be used as a powerful form of classroom pedagogy Duncum explores key concepts and curriculum examples to empower you to support students to develop a critical consciousness about pictures whether teaching art media language or social studies Drawing on the interpretive concepts of representation rhetoric ideology aesthetic pleasure intertextuality and the gaze Duncum shows how you can develop your students skills so that their power as viewers can match the power of pictures to seduce Examples from the history of fine art and contemporary popular mass media including Big Data and fake news are drawn together and shown to be appealing to the same aesthetic pleasures Often these pleasures are benign but also problematic helping to promote morally questionable ideas about a range of topics including gender race and sexual orientation and this is explored fully

Selling Air Power Steve Call,2009-03-01 In Selling Air Power Steve Call provides the first comprehensive study of the efforts of post war air power advocates to harness popular culture in support of their agenda In the 1940s and much of the 1950s hardly a month went by without at least one blatantly pro air power article appearing in general interest magazines Public fascination with flight helped create and sustain exaggerated expectations for air power in the minds of both its official proponents and the American public Articles in the Saturday Evening Post Reader s Digest and Life trumpeted the secure future assured by American air superiority Military figures like Henry H Hap Arnold and Curtis E LeMay radio television personalities such as Arthur Godfrey cartoon figures like Steve Canyon and actors like Jimmy Stewart played key roles in the unfolding campaign Movies like Twelve O Clock High The Court Martial of Billy Mitchell and A Gathering of Eagles projected onto the public imagination vivid images confirming what was coming to be the accepted wisdom that America s safety against the Soviet threat could best be guaranteed by air power coupled with nuclear capability But as the Cold War continued and the specter of the mushroom cloud grew more prominent in American minds another more sinister interpretation began to take hold Call chronicles the shift away from the heroic patriotic posture of the years just after World War II toward the threatening even bizarre imagery of books and movies

like *Catch 22* *On the Beach* and *Dr Strangelove* Call's careful analysis goes beyond the public relations campaigns to probe the intellectual climate that shaped them and gave them power *Selling Air Power* adds a critical layer of understanding to studies in military and aviation history as well as American popular culture *The Prophets* Carol J. Dempsey, Carol Dempsey's *The Prophets* provides a liberation critical reading of Israel's prophetic books including overviews of each book and discussions of specific passages Her approach allows her to plumb the depths of the texts potential for liberation as well as provide a critique of the tradition *The Portfolio*, 1886 **The Eclectic Magazine of Foreign Literature, Science, and Art**, 1872 **A History of Art in Ancient Egypt** Georges Perrot, Charles Chipiez, 1883 English Mechanic and Mirror of Science and Art, 1887 **Elementary Treatise on Physics, Experimental and Applied** Adolphe Ganot, 1873 **Catalyst**, 1977 **Chambers's Journal of Popular Literature, Science and Arts**, 1880 **The Undivine Comedy** Zygmunt Krasiński, 1875 *Scientific American*, 1896 *The Annals and Magazine of Natural History, Including Zoology, Botany, and Geology*, 1870 The Living Age, 1885 **The new Popular educator**, 1899 **PC Magazine**, 2005
