The Challenge of Global Capitalism Robert G. Gilpin, 2018-06-05 Many individuals proclaim that global capitalism is here to stay Unfettered markets they argue now drive the world and all countries must adjust no matter how painful this may be for some Robert Gilpin author of the widely acclaimed Political Economy of International Relations Princeton 1987 urges us however not to take an open and integrated global economy for granted Rather we must consider the political circumstances that have enabled global markets to function and the probability that these conditions will continue Gilpin s new book amounts to a magisterial inquiry into all major aspects of the contemporary world political economy Beginning with the 1989 end of the Cold War and the subsequent collapse of communism it focuses on globalization and rapid technological change and covers a broad sweep of economic developments and political cultures Gilpin demonstrates the fragility of a global and integrated economy and recommends what can be done to strengthen it The international community has another chance to solidify the global market economy that collapsed with the outbreak of World War I Yet writes Gilpin the full implications of this historic development for international affairs are not yet clear Will socialist economies make a successful transition to market type economies What role will a dynamic China play in the world economy Will the United States continue to exercise leadership or gravitate toward self centered policies Gilpin explores such questions along with problems in the areas of trade liberalization multinational corporations and destabilizing financial flows He also investigates the struggles of less developed countries and the spread of economic regionalism particularly in Europe North America and Pacific Asia which directly threatens an open world economy The author maintains that global capitalism and economic globalization have rested and must continue to rest on a secure political foundation However this foundation has eroded since the end of the Soviet threat To ensure survival of the global economy Gilpin concludes the United States and other major powers must recommit

themselves to working together to rebuild its weakened political foundations **Exploding the Myths** Joe Schneider, Paul D. Houston, 1993 **Die Europäische Gemeinschaft in der Welthandelsorganisation** Peter-Christian Müller-Graff, 1999

Economic Security and High Technology Competition in an Age of Transition Eric M. Green, 1996-03-30 This study was motivated by an awareness of the ever growing importance of technology on productivity and power in the information age It examines the relationship among national security economic competition and technology An underlying premise is that in an era of diminished military confrontation economic and technological power are acquiring enhanced importance in national security considerations Green believes that this is bound to promote closer coordination between government and private industry but not without tensions Using both a public policy and an economic focus his work seeks to clarify the debate on high technology industrial policy and to address the policy question of whether and how government should respond to competitive assaults in strategic industries Chicago Enterprise, 1990 **Bibliographie der Wirtschaftswissenschaften**, 1992 **Strengthening The U.s.-japan Partnership In The 1990s** Richard L.
