Martínez,José-María Montero,2024-10-31 This book highlights the latest technological innovations in economics education Economics as a discipline not only studies the relationship between ends and scarce means which can be used alternatively but also serves as a social science that uses historical data to predict future events a task complicated by the influence of human behavior In economics a solid theoretical foundation alone is insufficient practical application requires a deep understanding of statistics With the vast amount of information available today data processing is now performed using specialized software Consequently teaching economics demands a wide range of complex skills that have significantly evolved in recent years driven by the growing interest in educational innovation among professors and scientists further accelerated by advancements in new technologies Moreover economics education is increasingly aligned with the global concern for sustainability as emphasized in the United Nations Agenda 2030 Professors are now integrating sustainability into syllabi and teaching methodologies This book covers key topics such as Technological and innovative advancements in economics education New teaching learning theories and models in economics education The impact of digital transformation on economics education The role of artificial intelligence in economics education Addressing special educational needs in economics education Evaluation of the teaching learning process in economics Assessment of student learning in economics Development of materials and tools for economics education Final projects Undergraduate and Master s in economics Authored by leading professors and researchers in the field this book presents a collection of chapters that rigorously explore teaching innovations in economics Clashing Vulnerabilities, Disability and Conflict Don Kulick,Simo

Vehmas,2025-11-10 This book is about how we might think about vulnerability what it is and how it operates by looking at cases where different kinds of vulnerabilities clash Disability is often portrayed as a vulnerability in itself and disabled people are often labelled a prototypical vulnerable group This book disassembles that label by highlighting how vulnerabilities involving people with disabilities emerge and how they often conflict with other vulnerabilities the vulnerabilities of disabled students vs the vulnerabilities of under educated and harassed teachers for example Or the struggles for legitimacy that pit neuro divergent groups against people with chronic illnesses one casting doubt on the validity of the other Or the different uses of curb cuts for people in wheelchairs and people with visual impairments uses which sometimes clash Clashes like these illustrate the role that conflict plays in defining vulnerability and they lead us to think about how we might try to adjudicate between different claims of what can count as a vulnerability Providing new insight into power and non power ideology socioeconomic structures and the vicissitudes of disability as both a subject position and a lived experience this book will be of interest to scholars and students of disability studies anthropology and sociology policy and philosophy
