Cyber Week In The Us Returns:

Return to Winter Douglas E. Schoen, Melik Kaylan, 2015-12-01 The United States is a nation in crisis While Washington's ability to address our most pressing challenges has been rendered nearly impotent by ongoing partisan warfare we face an array of foreign policy crises for which we seem increasingly unprepared Among these none is more formidable than the unprecedented partnership developing between Russia and China suspicious neighbors for centuries and fellow Communist antagonists during the Cold War The two longtime foes have drawn increasingly close together because of a confluence of geostrategic political and economic interests all of which have a common theme of diminishing subverting or displacing American power While America's influence around the world recedes in its military and diplomatic power in its political leverage in its economic might and perhaps most dangerously in the power and appeal of its ideas Russia and China have seen their influence increase From their support for rogue regimes such as those in Iran North Korea and Syria to their military and nuclear buildups to their aggressive use of cyber warfare and intelligence theft Moscow and Beijing are playing the game for keeps Meanwhile America pledged to leading from behind no longer does much leading at all In Return to Winter Douglas E Schoen and Melik Kaylan systematically chronicle the growing threat from the Russian Chinese Axis and they argue that only a rebirth of American global leadership can counter the corrosive impact of this antidemocratic alliance which may soon threaten the peace and security of the world

Critical Perspectives on Cyberwarfare Jennifer Peters, 2018-07-15 In the twenty first century political hostilities have moved largely from the battlefield to cyberspace Since the Stuxnet virus was uncovered in 2010 built jointly by U S and Israeli intelligence to disarm the Iranian nuclear program attention has been drawn to the real life damage that such virtual programs can inflict In this book a range of experts from journalists to lawyers to government officials offer their varied opinions on the dawn of cyberwarfare allowing readers to determine where they stand on this important issue

Asia's New Geopolitics Desmond Ball, Lucie Béraud-Sudreau, Tim Huxley, C. Raja Mohan, Brendan Taylor, 2021-09-28 Intensifying geopolitical rivalries rising defence spending and the proliferation of the latest military technology across Asia suggest that the region is set for a prolonged period of strategic contestation None of the three competing visions for the future of Asian order a US led Free and Open Indo Pacific a Chinese centred order or the ASEAN inspired Indo Pacific

Outlook is likely to prevail in the short to medium term In the absence of a new framework the risk of open conflict is heightened and along with it the need for effective mechanisms to maintain peace and stability As Asia s leaders seek to rebuild their economies and societies in the wake of COVID 19 they would do well to reflect upon the lessons offered by the pandemic and their applicability in the strategic realm The societies that have navigated the crisis most effectively have been able to do so by putting in place stringent protective measures Crisis management and avoidance mechanisms and even in the longer term wider arms control can be seen as the strategic equivalent of such measures and as such they should be pursued with urgency in Asia to reduce the risks of an even greater calamity

Cybersecurity Governance in Latin America Carlos Solar,2023-01-01 Cybersecurity Governance in Latin America discusses how the massification of the Internet has exposed emerging democracies high tech vulnerabilities to cyber attacks and questions why states have decided to introduce policies and legislation facilitating the militarization of cyberspace Carlos Solar offers a comparative analysis using the cases of Argentina Brazil Chile Colombia Mexico and Venezuela to help navigate the changing security landscape and the growing risks found in the digital domain His analysis includes a review of civilian and military preparedness emphasizing the ongoing alliances with the world s superpowers to finally debate what are the side effects for peace and development in the Americas from the current cybersecurity rivalry between the United States and China Providing a much needed account of state technology affairs in the global south Cybersecurity Governance in Latin America challenges scholars and policymakers to rethink the protection of cyberspace to avoid unnecessarily sacrificing rights and freedoms in the name of national security
