Injury Report Update Returns:

Return-to-Play after Lower Limb Muscle Injury in Football Gian Nicola Bisciotti, Alessandro Corsini, Piero Volpi, 2021-10-18 Return to training RTT and return to play RTP decisions making process in football are currently based on expert's opinion. However, there are no consensus guidelines on evidence-based decision making. This book provides a framework for evidence-based decision making both in RTT and RTP following lower limb muscle injuries sustained in football. Based on the Italian Consensus Conference 2019 on return to play after lower limb muscle injury in football, it provides a list of RTT and RTP criteria after such injuries compiled by orthopedic surgeons, sports physicians, radiologists, rehabilitation physicians, sport physiologists, general surgeons, family physicians, physiotherapists, physical trainers, and psychologists working in elite football in Italy. The book identifies the main criteria for RTT and RTP following injuries involving the most important muscle groups: i.e. quadriceps, hamstring, hip adductor, hip external rotator, iliopsoas, and soleus/gastrocnemius. As such, it is a valuable reference resource for practitioners making RTT and RTP decisions making process.

National Parts Return Program. Final Report. Volume 3 - PRP News and Program Inputs M. Lowery, 1979 **The Anatomy of Competition in Sports** Christopher B. Doob, 2015-06-17 Thousands of children across the United States dream of becoming professional athletes, yet less than one in a thousand high school seniors will go on to play in a major pro league. Of those select few, many will find that after a childhood of full-time commitment to their sport, their professional careers will likely be brief and injury-ridden. Within each of the top professional leagues in the U.S., the competition is fierce: to not only get into the league but to stay there, the average career in the National Basketball Association lasts less than five years, and in the National Football League, only three and a half. *The Anatomy of Competition in Sports: The Struggle for Success in Major US Professional Leagues* examines the role competition plays in each of the

major sports leagues in the United States Major League Baseball MLB the National Football League NFL the National Basketball Association NBA the Women s National Basketball Association WNBA the National Hockey League NHL and Major League Soccer MLS In order to provide a comprehensive review of competition within each sport Christopher B Doob scrutinizes the challenges faced at the youth level opposition encountered by individuals competing to join a pro league the obstacles pros must overcome throughout their careers and the history of each league Furthermore Doob dissects competition across the sports by looking at such common influences as family school colleges the draft process coaches and the playing conditions within the professional leagues An additional chapter examines so called atypical pros such as disabled athletes gay and lesbian players and two sport pros who must face competitive challenges beyond the average athlete A final chapter discusses life after the pros including the legacy of debilitating injuries many former players face and the prospects of post retirement jobs such as coaching managing and broadcasting Highlighting the struggles many athletes must face *The Anatomy of Competition in Sports* features vignettes about current and past professionals including Mariano Rivera Earl Campbell Candace Parker and Sidney Crosby Drawing on diverse sources such as histories of each league research studies newspaper accounts and personal narratives this book is simultaneously thought provoking and accessible for all sports fans
