Black Social Capital Marion Orr, 1999 Deindustrialization white flight and inner city poverty have spelled trouble for Baltimore schools Marion Orr now examines why school reform has been difficult to achieve there revealing the struggles of civic leaders and the limitations placed on Baltimore s African American community as each has tried to rescue a failing school system Examining the interplay between government and society Orr presents the first systematic analysis of social capital both within the African American community black social capital and outside it where social capital crosses racial lines Orr shows that while black social capital may have created solidarity against white domination in Baltimore it hampered African American leaders capacity to enlist the cooperation from white corporate elites and suburban residents needed for school reform Orr examines social capital at the neighborhood level in elite level interactions and in intergovernmental relations to argue that black social capital doesn t necessarily translate into the kind of intergroup coalition needed to bring about school reform He also includes an extensive historical survey of the black community showing how distrust engendered by past black experiences has hampered the formation of significant intergroup social capital The book features case studies of school reform activity including the first analysis of the politics surrounding Baltimore s decision to hire a private for profit firm to operate nine of its public schools These cases illuminate the paradoxical aspects of black social capital in citywide school reform while offering critical perspectives on current debates about privatization site based management and other reform alternatives Orr s book challenges those who argue that social capital alone can solve fundamentally political problems by purely social means and questions the efficacy of either privatization or black community power to reform urban schools Black Social Capital offers a cogent conceptual synthesis of social capital theory and urban regime theory that demonstrates the importance of government politics and leadership in converting social capital into a resource that can be mobilized for

effective social change      **Changing Urban Education** Clarence Nathan Stone,1998 With critical issues like desegregation and funding facing our schools dissatisfaction with public education has reached a new high Teachers decry inadequate resources while critics claim educators are more concerned with job security than effective teaching Though urban education has reached crisis proportions contending players have difficulty agreeing on a common program of action This book tells why Changing Urban Education confronts the prevailing naivete in school reform by examining the factors that shape reinforce or undermine reform efforts Edited by one of the nation s leading urban scholars it examines forces for change and resistance in urban education and proposes that the barrier to reform can only be overcome by understanding how schools fit into the broader political contexts of their cities Much of the problem with our schools lies with the reluctance of educators to recognize the profoundly political character of public education The contributors show how urban political contexts vary widely with factors like racial composition the role of the teachers union and relations between cities and surrounding metropolitan areas Presenting case studies of original field research in Baltimore Chicago Houston and six other urban areas they consider how resistance to desegregation and the concentration of the poor in central urban areas affect education and they suggest how cities can build support for reform through the involvement of business and other community players By demonstrating the complex interrelationship between urban education and politics this book shows schools to be not just places for educating children but also major employers and large spenders of tax dollars It also introduces the concept of civic capacity the ability of educators and non educators to work together on common goals and suggests that this key issue must be addressed before education can be improved Changing Urban Education makes it clear to educators that the outcome of reform efforts depends heavily on their political context as it reminds political scientists that education is a major part of the urban mix While its prognosis is not entirely optimistic it sets forth important guidelines that cannot be ignored if our schools are to successfully prepare children for the future      *Zeitschrift für Wirtschaftsgeographie* ,2005      *The Impact of Federal Antipoverty Policies* Charles Brecher,1973      Research Methods in Education Louis Cohen, Lawrence Manion, Keith Morrison,2002-09-11 This is a new edition of one of our best selling textbooks The authors have thoroughly updated the fourth edition and included more text on current developments in research practice action research developments in ICT questionnaire design ethnographic research conducting needs analysis constructing and using tests observational methods reliability and validity ethical issues and curriculum research The entire text has been redesigned to cater for the increasingly sophisticated needs of the educational researcher The new edition is more comprehensive up to date and user friendly with increased accessibility The authors who are experienced teachers in the field have produced a better written book if that s possible containing readable and realistic views of research and methodology and show how to interpret the data      Transforming Power Dietrich Kerschull,2017-09-08 In 1934 Lewis Mumford critiqued the industrial energy system as a key source of authoritarian economic and political tendencies in modern life Recent debate continues to

engage issues of energy authoritarianism focusing on the contest between energy driven globalization the spread of energy deregulation and the simultaneous consolidation of the oil coal and gas industries and the so called sustainable energy strategy that celebrates the local and community scale characteristics of renewable energy Including theoretical inquiries and case studies by distinguished writers Transforming Power is divided into three parts Energy Environment and Society The Politics of Conventional Energy and The Politics of Sustainable Energy It interrogates current contemporary energy assumptions exploring the reflexive relationship between energy environment and society and examining energy as a social project Some of these have promised a prosperous future founded upon technological advances that further modernize the modern energy system such as inherently safe nuclear power environmentally friendly coal gasification and the advent of a wealthier cleaner world powered by fuel cells and the green technologies said by advocates to prefigure a revival of human scale development local self determination and a commitment to ecological balance br This volume offers a timely engagement of the social issues surrounding energy conflicts and contradictions It will be of interest to policymakers energy and environmental experts sociologists and historians of technology
