## **Practical Eventing:**

**Event Theory for a Sociology of Practice** Frank Hillebrandt, 2025-05-22 The sociological theory of practices developed in this book from the concept of the event compels us to question how practices not only chain into forms of practice The approach also allows us to see how these practices give rise to practice formations that manifest as enduring zones of intensity within society This very problem is at the center of the considerations pursued here and is unfolded through an analysis of pop music as a formation of practice As an exemplary case study the author chooses the Love and Peace Festival on Fehmarn from the year 1970 In doing so the book brings to life a period of pop music that has much more to do with our present than it may seem at first glance [Grammatical Theory in the United States](#) Peter Hugoe Matthews, 1993-09-30 This is a history of modern linguistics which focuses on the spread and dominance of linguistic theory originating in North America It concentrates on the theories and influence of Bloomfield and Chomsky and offers systematic coverage of their enormous contributions to grammatical theory over their lifespan As well as tracing the intellectual histories of these great figures and of others in the field Professor Matthews follows the development and continuity of three dominant grammatical ideas in linguistics First the idea that the study of formal relations can and should be separated from that of meaning Second that sentences are composed of linear configurations of morphemes Third that many aspects of grammar are defined generically His biographical and theoretical survey will be invaluable to all linguists wishing to trace the origins of their discipline

reflective practice Therefore readers are provided with information that demonstrates the different phases of reflection that make up an effective cycle of reflective practice It is through the chapters that readers will be able to distinguish the different foci and levels of reflection thus enabling them to engage in reflective practice more effectively The Malaysian context that the book brings gives readers insights into a lesser known context and its people culture and educational system as a whole for comparison The book is written with the needs of student teachers and teacher educators in mind However the model reconceptualised is transferable to other disciplines too

A Refutation of Positivism in Philosophy of Mind Pieter A.M. Seuren,2023-05-05 This book argues that positivism though now the dominant paradigm for both the natural and the human sciences is intrinsically unfit for the latter In particular it is unfit for linguistics and cognitive science where it is ultimately self destructive since it fails to account for causality while the mind the primary object of research of the human sciences cannot be understood unless considered to be an autonomous causal force Author Pieter Albertus Maria Seuren who died shortly after this manuscript was finished and after a remarkable career reviews the history of this issue since the seventeenth century He focuses on Descartes Leibniz British Empiricism and Kant arguing that neither cognition nor language can be adequately accounted for unless the mind is given its full due This implies that a distinction must be made following Alexius Meinong but against Russell and Quine between actual and virtual reality The latter is a product of the causally active mind and a necessary ingredient for the setting up of mental models without which neither cognition nor language can function Mental models are coherent sets of propositions and can be wholly or partially true or false Positivism rules out mental models blocking any serious semantics and thereby reducing both language and cognition to caricatures of themselves Seuren presents a causal theory of meaning linking up language with cognition and solving the old question of what meaning actually amounts to Key Features Provides a fundamental reassessment of the methodology of the humanities Makes a distinctive contribution to the conceptual foundations of linguistics and philosophy of mind Explores the philosophical and historical origins of central developments in the human sciences in the past 100 years Offers a new approach to ontology and epistemology in the scientific study of the creative human mind and its products
