Practical Fiberoptic Intubation:

Benumof's Airway Management Jonathan Benumof, Carin A. Hagberg, 2007-01-01 Airway Management is one of the fundamental fields of knowledge that every resident anesthesiologist and Nurse Anesthetist must master to successfully manage surgical patients. The new edition of this highly successful text has a new editor and increased coverage of pre and post intubation techniques. Fully illustrated and tightly focused, this unique text is the only volume of its kind completely dedicated to airway management. Complete with the latest ASA guidelines, no other volume does what Benumof's Airway Management does. This is the definitive reference on airway management and it belongs on your shelf. Offers a how to approach to airway management. Includes case examples and analysis. Highly illustrated format provides clarity on complex procedures. A new editor and 50% new contributors bring you the latest research and practice guidelines. Over two hundred new illustrations highlight complex procedures and monitoring techniques with greater clarity. The latest ASA Guidelines make you aware of exactly what procedures are required in difficult cases. Increased complete coverage of pre and post intubation techniques takes you from equipment selection through management of complications. **A Practice of Anesthesia for Infants and Children** Charles J.
