Ripples In The Cosmos A View Behind The Scenes Of The New Cosmology:

Ripples in the Cosmos Michael Rowan-Robinson,1993 Rowan Robinson discusses how galaxies clusters of galaxies and even larger structures formed in a universe which was initially of almost perfect uniformity and how the recently detected ripples connect with these developments Between Understanding and Trust Meinolf Dierkes,2005-06-28 This book identifies and analyses the public understanding of science and technology and makes an important new contribution towards restoring public faith in scientific authority **The Very First Light** John Boslough,John Mather,2008-10-20 In the early 1990s a NASA led team of scientists changed the way we view the universe With the COBE Cosmic Background Explorer project they showed that the microwave radiation that fills the universe must have come from the Big Bang effectively proving the Big Bang theory beyond any doubt It was one of the greatest scientific findings of our generation perhaps of all time In *The Very First Light* John Mather one of COBE s leaders and science writer John Boslough tell the story of how it was achieved A gripping tale of big money bigger egos tense politics and cutting edge engineering *The Very First Light* offers a rare insider s account of the world of big science **Public Understanding of Science** ,1994 An international journal of research in the public dimensions of science and technology Science In Public Jane Gregory,Steven Miller,2000-09-07 Does the general public need to understand science And if so is it scientists responsibility to communicate Critics have argued that despite the huge strides made in technology we live in a scientifically illiterate society one that thinks about the world and makes important decisions without taking scientific knowledge into account But is the solution to this illiteracy to deluge the layman with scientific information Or does science news need to be focused around specific issues and organized into stories that are meaningful and relevant to people s lives In this unprecedented comprehensive look at a new field Jane Gregory and Steve Miller point the way to a more effective public understanding of science in the years ahead *Contemporary Authors* Terrie M. Rooney,2001-09 Your students and users will find biographical information on approximately 300 modern writers in this volume of *Contemporary Authors R* Astronomy Now ,2007 **Popular Physics and Astronomy** Roger Smith,1996-07-11 An essential resource to this growing and important body of popular physics and astronomy literature The 895 books articles and nonprint media are divided by subject and include chapters devoted to the history of physics basic principles books for children and young adults and audiovisual presentations Navigating the Tides of Change David La Chapelle,2001 This evocative work addresses the challenge of navigating the accelerating pace of change effectively so that we can live more sustainably through the medium of stories told from modern science esoteric and spiritual traditions and Earth wisdom By integrating these often strange bedfellows as well as by emulating great thinkers and doers from history *Navigating the Tides of Change* presents a compelling case that humankind can create a future in harmony with the Earth **The Space Shuttle** David M. Harland,1998-07-14 Presents the Space Shuttle as a utilitarian craft focusing on its origins operations and importance to many scientific missions **The**
