state conflict in the Philippines Dictatorships are amongst the case studies such as Cuba and Burma along with democracies such as the USA and India No evidence is found to suggest that disaster diplomacy is a prominent factor in conflict resolution Instead disaster related activities often influence peace processes in the short term over weeks and months provided that a non disaster related basis already existed for the reconciliation That could be secret negotiations between the warring parties or strong trade or cultural links Over the long term disaster related influences disappear succumbing to factors such as a leadership change the usual patterns of political enmity or belief that an historical grievance should take precedence over disaster related bonds This is the first book on disaster diplomacy Disaster politics interactions have been studied for decades but usually from a specific political framing covering a specific geographical area or from a specific disaster framing As well plenty of quantitative work has been completed yet the data limitations are rarely admitted openly or thoroughly analysed Few publications bring together the topics of disasters and politics in terms of a disaster diplomacy framework yielding a grounded qualitative scientific point of view on the topic
