Rise Of The Modern State:

The Rise of the Modern State James Anderson, 1986 *From Religious Empires to Secular States* Birol Bařkan, 2014-03-26 In the 1920s and the 1930s Turkey Iran and Russia vehemently pursued state secularizing reforms but adopted different strategies in doing so But why do states follow different secularizing strategies The literature has already shattered the illusion that secularization of the state has been a unilinear homogeneous and universal process and has convincingly shown that secularization of the state has unfolded along different paths Much however remains to be uncovered This book provides an in depth comparative historical analysis of state secularization in three major Eurasian countries Turkey Iran and Russia To capture the aforementioned variation in state secularization across three countries that have been hitherto analyzed as separate studies Birol Ba kan adopts three modes of state secularization accommodationism separationism and eradicationism Focusing thematically on the changing relations between the state and religious institutions Ba kan brings together a host of factors historical strategic and structural to account for why Turkey adopted accommodationism Iran separationism and Russia eradicationism In doing so he expertly demonstrates that each secularization strategy was a rational response to the strategic context the reformers found themselves in *Hybrid Sovereignty in the Arab Middle East* G. Bacik, 2007-12-25 This book provides readers with a fresh analysis of the Arab state by using a new theoretical framework hybrid sovereignty The author examines various areas to make his argument citizenship the issue of minorities electoral engineering the failure of central rule tribalism and the lack of impersonal bureaucratic mechanism

The Early Modern State: Drivers, Beneficiaries and Discontents Pepijn Brandon, Lex Heerma van Voss, Annemieke Romein, 2022-06-30 In the course of the early modern period the capacity of European states to raise finances wage wars subject their own and far away populations and exert bureaucratic power over a variety of areas of social life increased dramatically Nevertheless these changes were far less absolute and definitive than the literature on the rise of the modern state once held While war pushed the boundaries of the emerging fiscal military states of the seventeenth and eighteenth centuries rulers remained highly dependent on negotiations with competing elite groups and the private networks of contractors and financial intermediaries Attempts to increase control over subjects often resulted in popular resistance that in their turn set limits to and influenced the direction of the development of state institutions Written in honour of the leading historian of war and state formation in the early modern Low Countries Marjolein t Hart the chapters gathered in this volume examine the main drivers beneficiaries and discontents of state formation across and beyond Europe in the early modern period

At the Margins of the Modern State Seyla Benhabib, 2025-03-20 The international order of the post WW II period is in disarray The sounds of war can be heard all around us from Ukraine to Gaza from Darfur to the Congo and there is growing skepticism towards human rights and democracy the rule of law and peace among peoples Facile expressions such as Eurocentrism and demise of the West and the rise of the rest miss the real challenge in this situation how to extend moral legal and political universalism to address the experiences of the multitude of humanity for whom

western modernity has brought not only equality but also subordination not only emancipation but also domination Benhabib argues that rethinking this universalist project and participating in world building together can be achieved by reconstructing and retrieving the best insights of critical social theory in the Frankfurt tradition and the liberal Kantianism of Rawls and Dworkin In that spirit this volume addresses state and popular sovereignty Third World approaches to International Law the 1951 Refugee Convention and climate change legislation while focusing on the changing fortunes of the European Union and cosmopolitanism Benhabib engages with postcolonial thinkers and argues that although validity claims and relations of domination and inequality are often intermixed it is possible to reconstruct the insights of international law to serve a more inclusive universalism and world building This vibrant defense of human rights and universal norms in an age of political skepticism and extremism will appeal to a wide readership and will be of particular interest to students and scholars in political theory critical theory and law
