Risk And Culture An Essay On The Selection Of Technical And Environmental Dangers:

Risk and Culture Mary Douglas, Aaron Wildavsky, 1983-10-27 Can we know the risks we face now or in the future No we cannot but yes we must act as if we do Some dangers are unknown others are known but not by us because no one person can know everything Most people cannot be aware of most dangers at most times Hence no one can calculate precisely the total risk to be faced How then do people decide which risks to take and which to ignore On what basis are certain dangers guarded against and others relegated to secondary status This book explores how we decide what risks to take and which to ignore both as individuals and as a culture *Risk and Culture* Mary (Tew) Douglas, Aaron B. Wildavsky, 1982 *Risk and Culture* Mary Douglas, 1980 **Literatur als Wagnis / Literature as a Risk** Monika Schmitz-Emans, 2013-10-29 Die Auseinandersetzung mit der komplexen Semantik des Begriffs Wagnis sowie mit der des Nachbarbegriffs Risiko verspricht Aufschluss über wichtige Komponenten wenn nicht sogar Grundzüge des literarischen Schreibens in der Moderne und zumal in der Gegenwart Die Beiträge des komparatistischen DFG Symposiums beleuchten die Geschichte der Konzeptualisierung des Wagnis und des Risiko Begriffs in literarischen ästhetisch poetologischen und historischen Kontexten Dabei erläutern sie sowohl den Anteil den die Literatur an Selbstbeschreibungen der Moderne im Zeichen von Wagnis und Risikodiskursen hat als auch dem spezifisch gewagten oder riskanten Grundzug literarischer künstlerischer Arbeit selbst Sie gliedern sich in fünf Sektionen I Diskursgeschichte des Risikos II Literatur und Wissensdiskurse als Risikodiskurse III Risiken literarischer künstlerischer Produktion Risiken der Verständigung Risiken der Rezeption und medienbedingte Risiken IV Wagnis Risiko und ihre Anschlussfähigkeit an poetologische Konzepte und Zentralbegriffe V Risiken und Wagnisse als Themen literarischer Darstellung *The Social and Cultural Construction of Risk* B.B. Johnson, V.T. Covello, 2012-12-06 The Social and Cultural Construction of Risk Issues Methods and Case Studies Vincent T Covello and Branden B Johnson Risks to health safety and the environment abound in the world and people cope as best they can But before action can be taken to control reduce or eliminate these risks decisions must be made about which risks are important and which risks can safely be ignored The challenge for decision makers is that consensus on these matters is often lacking Risks believed by some individuals and groups to be tolerable or acceptable such as the risks of nuclear power or industrial pollutants are intolerable and unacceptable to others This book addresses this issue by exploring how particular technological risks come to be selected for societal attention and action Each section of the volume examines from a different perspective how individuals groups communities and societies decide what is risky how risky it is and what should be done The writing of this book was inspired by another book *Risk and Culture An Essay on the Selection of Technological and Environmental Dangers* Published in 1982 and written by two distinguished scholars Mary Douglas a British social anthropologist and Aaron Wildavsky an American political scientist the book received wide critical attention and offered several provocative ideas on the nature of risk selection perception and acceptance *Umwelt Global* Martin Jänicke, Hans-Jürgen Bolle, Alexander Carius, 2013-03-07 In

zunehmendem Maße wird deutlich, dass Veränderungen in der Umwelt über komplexe Rückkopplungen in alle Bereiche der menschlichen Existenz einwirken. Naturwissenschaftliche Feststellungen müssen daher von sozialwissenschaftlichen Analysen begleitet werden, mit dem Ziel Handlungsansätze für Politik, Wirtschaft und Gesellschaft zu erarbeiten. Das vorliegende Buch von kompetenten Wissenschaftlern zusammengestellt, erlaubt dem Leser die Bedeutung langfristiger Umweltveränderungen und Herausforderungen für die Zukunft zu erkennen.

Biosafety Measures, Technology Risks and the World Trade Organization Alessandra Guida, 2022-12-23 This book examines the work of the World Trade Organization (WTO) with a focus on the capacity of its judiciary to strike a reasoned balance between free trade in biotechnology and biosafety as to promote the 2030 Agenda for Sustainable Development and its Sustainable Development Goals. By adopting an innovative interpretation of the precautionary principle and proportionality analysis, the work offers normative suggestions to develop what the author terms a constructive bridge of knowledge between decision makers, scientists, social experts and expert witnesses which can support a judicial balance by design rather than by chance. Biotechnology is sometimes regarded as a panacea for modern day challenges such as feeding a growing world population and counteracting climate change problems and a means of offering significant economic opportunities. However, biotechnology can present uncertain though serious risks to human health and the environment, i.e. biosafety. Trading biotech products magnifies these risks and benefits globally. This book explores the topical though still underexplored question of how to find a point of equilibrium between the revolutionary advancement offered by technology and the need to safeguard biosafety from uncertain though potentially irreversible technology risks. It offers a thorough analysis of normative, judicial and epistemic issues hindering a reasoned balance between trade and non-trade interests under the WTO. The work offers practical relevance for the resolution of legal disputes in contexts of uncertainty as well as innovative theoretical contributions. It will be a valuable resource for policymakers working on precautionary governance and management, scholars in the areas of trade law, human rights law and environmental law, law students and practitioners as well as NGOs working in the field of new technologies, biosafety, sustainability and food safety.

Riskante Technologien Wolfgang Krohn, 1993 [Making Electricity Resilient](#) Antti Silvast, 2017-04-21 Energy risk and security have become topical matters in Western and international policy discussions ranging from international climate change mitigation to investment in energy infrastructures to support economic growth and more sustainable energy provisions. As such, ensuring the resilience of more sustainable energy infrastructures against disruptions has become a growing concern for high-level policy makers. Drawing on interviews, participant observation, policy analysis and survey research, this book unpacks the work of the authorities, electricity companies and lay persons that keeps energy systems from failing and helps them to recover from disruptions if they occur. The book explores a number of important issues: the historical security policy of energy infrastructures, control rooms where

electricity is traded and maintained in real time and electricity consumers in their homes Presenting case studies from Finland and Scandinavia with comparisons to the United States the United Kingdom and the European Union at large Making Electricity Resilient offers a detailed and innovative analysis of long term priorities and short term dynamics in energy risk and resilience This book will be of great interest to students and scholars of energy policy and security and science and technology studies

COVID-19 in Italy Lucia Velotti, Gabriella Punziano, Felice Addeo, 2022-04-19 As the COVID 19 crisis began to take shape all eyes were on Italy the first Western country to attempt a response to the deadly pandemic For institutional decision makers and average citizens alike it was a time of deep uncertainty As scientists struggled to understand the nature of the virus and how it spread the gradualness with which information became available caused only deeper uncertainty as did the inevitable disagreements over which protective actions the government should put in place Despite some initial delay in its response the Italian government eventually implemented a nationwide lockdown which helped control the spread of the disease but simultaneously created unintended consequences for vulnerable populations like small business owners women the elderly and workers living paycheck to paycheck Drawing on data surveys conducted during the transition between the first lockdown and staged reopening this book examines people s risk perception and their willingness to trust the sources and channels of information that were available to them It also looks at their attitudes toward the protective behaviors they were asked to adopt and the ways in which their own cultural worldviews impacted their support for pandemic response policies With remarkable depth and candor respondents reflected on what a post COVID 19 Italy might look like filling out the book with the hopes and fears of real people who had stared death in the face and lived to tell about it The book looks ahead to possibilities for future research policy and practice COVID 19 in Italy elaborates and tests several aspects of the Protective Action Decision Model PADM in the Italian context introducing the concept of ontological security and insecurity as an explanatory change factor to help interpret the Italian experience of responding to COVID 19
