Nest Smart Home Electronics: An Easy Guide to the Best Features Bill Stonehem, 2016-07-28 Nest electronics was a producer of automated home electronics that have the ability to learn and are operated by sensor and Wi-Fi connection. The first product ever made by the company was a Nest Learning Thermostat that they developed in 2011. The company was founded in 2010 by Tony Fadell and Matt Rogers who were both former engineers at Apple. The company has grown tremendously since its start moving from 130 employees to 1,100 and is highly praised for its smart home devices.

Creating Value Through Technology Andrew Hampshire, 2020-11-12 Hampshire's book is aimed at the lay reader and its pages are peppered with practical advice and illustrative case studies. Irish Times Business leaders are often too busy to familiarise themselves with the benefits and risks of technical undertakings such as new IT plans or changing digital platforms. Yet if managed effectively, such initiatives can result in huge returns. *Creating Value Through Technology* provides CEOs, business owners, and directors with a clear and accessible guide to the most prominent and profitable technologies that are available, allowing them to confidently implement and sustain new tech strategies. Different elements of the value chain can be supported and enhanced by different technologies, so it's important to understand how investments in tech can drive revenue growth, profitability, and the valuation of a business. In this informative yet approachable book, Andrew Hampshire draws upon years of experience and an array of case studies to assess the potentiality and feasibility of different technologies in creating value based on a business's overall strategy. Andrew's book is centred around the basic levers of shareholder value creation: revenue growth, earnings growth, and cash generation, alongside the multiples used to value businesses. The book applies this framework to existing and burgeoning technologies, exploring where they can be best implemented and sustained to encourage growth. With *Creating Value Through Technology*, business leaders will discover a newfound confidence in incorporating technological strategies that will revolutionise their business for the digital age.

The business model cycle Sophia von Berg, 2020-12-17 Today, firms all over the world have to deal with dynamic business environments. Fast-moving digitalization has made information more transparent, strengthening the role of the customer. At the same time, the provider can have a much closer relationship with the user thanks to real-time communication. However, corporate practice does not have a process for developing dynamic business models and user-centric business models that can be designed and changed using smart technologies. Have not yet been systematically integrated. To stay competitive, companies need to rise to this challenge. The aim of this dissertation was to develop a dynamic user-centric process model for business model design and change and to evaluate the model's ability to maintain a competitive advantage in the mobility sector. First, the differences between static dynamic and user-centric business models and their corresponding attributes were deduced. Then, these findings were combined into a process model using system dynamics logic. This model considers the user a co-creator of value and helps managers react to real-time changes in their business model environment. Finally, a mobility sector

case study is presented to highlight the relevance of this model to real world application This business model cycle BMC supports the strategic management of dynamic user centric business model design and change activities It describes a step by step procedure of business model design that includes ideation prototyping and integration of business model options Moreover it allows continuous monitoring of the business model environment and adaption of the model accordingly At the same time bidirectional interaction between the user and provider is possible allowing the provider to adapt to their users needs The BMC is unique in that these processes can take place simultaneously Finally the real world case study in the mobility sector confirmed that using the BMC for strategic management maintains a lasting competitive business advantage
