*Workforce shortage in a digital era. Can 100% remote work attract more qualified candidates?* Huong Hoang Thien, 2023-05-25 Master's Thesis from the year 2023 in the subject Leadership and Human Resources Recruiting grade 1.0 language English abstract What will happen if there aren't enough talents to fill the market in the future due to the demographical change This study focuses on the potential of offering 100% remote work to counteract the workforce shortage in Germany An empirical study has been conducted as an online survey to gain an overview of Germany's 100% remote job market In a fast-changing world digital transformation has become an evitable process for companies to adapt to new technologies and market trends The digital transformation in Germany has been significantly impacted by the COVID-19 pandemic positively and negatively On the one hand the pandemic forced German companies to embrace new technology more quickly and adapt to remote work However on the other hand it pointed out Germany's weaknesses in digital infrastructures and cybersecurity Additionally many German companies face a shortage of workers due to digital transformation Another reason that causes workforce shortage is demographical change Companies cannot operate their business correctly increase revenue or drive innovations to survive in a competitive market without suitable candidates Furthermore the digital revolution shaped the current digital generations as potential workers exhibit different digital behaviors and preferences Therefore companies must know them and their work preferences to fill the workforce shortage gap Remote working as a sub-trend of the mega-trend New Work has become the new standard for workers especially since the pandemic However there aren't any specific regulations regarding remote work in Germany yet In general remote work provides workers e.g. more freedom and a better work-life balance Nevertheless remote work also has the downside such as workers experiencing isolation and loneliness due to the lack of social contact with co-workers less

productivity outside of the office etc For companies offering remote work gives them complete access to the talent pools including freelancers as external workers reducing costs due to fewer offices being more attractive to job seekers But on the other side remote leadership has become a big challenge for leaders Furthermore companies have to deal more with cyber security When everything is going remotely companies have become an easier target of cyber attacks

**Positional Competition and Social Inequality in Graduate Careers** Ulpukka Isopahkala-Bouret, Gerbrand Tholen, Agnès van Zanten, 2025-03-18 This book examines how social inequalities in higher education shape the positional competition in graduate labour markets Featuring research from Europe North America and China the book provides new insights into graduate careers by examining how graduates from various backgrounds navigate their labour market trajectories in different national contexts Based on in depth case studies it demonstrates how the opportunities for graduates in the labour market do not solely depend on individual skills experience and abilities but on how other graduates act within the labour market and the different forms of capital they possess This book delineates the social cultural and educational conditions through which positional competition becomes meaningful to employers and graduates It explains why employers value and seek out university graduates when hiring and demonstrates how the value of educational credentials interacts with graduates gender ethnicity and social class positions Furthermore it addresses how regional inequalities influence graduates employment opportunities This book is essential for university students and scholars policymakers and anyone interested in the recruitment of graduates It was originally published as a special issue of the Journal of Education and Work
