Kingdom Buildings Kenneth Padley, 2025-05-21 *Kingdom Buildings* reveals the overlooked potential of church buildings and grounds as tools for mission and growth Too often seen as burdens this practical and inspiring guide helps church communities rediscover them as gifts spaces that can enrich both congregational life and the wider community Blending theology ecclesiology and hands on advice *Kingdom Buildings* offers both a fresh vision and practical steps to tackle even the most daunting challenges It shows how small affordable changes can spark momentum and create lasting impact while also guiding readers to make wise long term decisions for the good of future generations With thoughtful attention to issues such as accessibility carbon reduction and ecological stewardship especially within the unique constraints of heritage sites this book equips churches to care for their buildings as faithful stewards and mission minded hosts

The Great Race Levi Tillemann, 2016-01-19 *The Great Race* recounts the exciting story of a century long battle among automakers for market share profit and technological dominance and the thrilling race to build the car of the future The world's great manufacturing juggernaut the 3 trillion automotive industry is in the throes of a revolution Its future will include cars Henry Ford and Karl Benz could scarcely imagine They will drive themselves won't consume oil and will come in radical shapes and sizes But the path to that future is fraught The top contenders are two traditional manufacturing giants the US and Japan and a newcomer China Team America has a powerful and little known weapon in its arsenal a small group of technology buffs and regulators from California The story of why and how these men and women could shape the future how you move how you work how you live on Earth is an unexpected tale filled with unforgettable characters a scorned chemistry professor a South African visionary who went for broke an ambitious Chinese ex pat a quixotic Japanese nuclear engineer and a string of billion dollar wagers by governments and corporations To explain the scramble for the next generation auto and the roles played in that race by governments auto makers venture capitalists environmentalists and private inventors comes Levi Tillemann's *The Great Race* Mr Tillemann seems ideally cast to guide us through the big ideas percolating in the world's far flung workshops and labs *The Wall Street Journal* His account is incisive and riveting explaining how America bounced back in this global contest and what it will take to command the industrial future

***Women Behind the Wheel* Nancy A. Nichols, 2024-03-05** From the adolescent thrill of getting a driver's license to the dreaded commutes of adulthood from vintage muscle cars to electric vehicles this groundbreaking book reveals the outsized impact the car has had and will continue to have on the lives of women Since their inception cars have defined American culture but until quite recently car histories were largely written by and about men with little attention given to the fascinating story of women and cars In this engaging non fiction narrative Nancy A Nichols the daughter of a used car salesman uses the cars her father sold and the ones her family drove to tell a larger story about how the car helped to define modern womanhood From her sister's classic

Mustang to her mother's Chevy Convertible to her own Honda minivan Nichols tells a personal story in order to shed light on a universal one Cars helped women secure the right to vote changed the nature of romance and influenced both fashion and child rearing customs In the just over 100 years since their inception cars have created possibilities for commerce and romance even as they exposed women to new kinds of danger Women Behind the Wheel explores the uniquely gendered landscape of the automobile detailing the many reasons why cars are both more expensive and more dangerous for women drivers The automobile is on the cusp of momentous change As we advance into the era of electric connected and autonomous vehicles Nichols shows us why we should hit the brakes and look back in the rear view mirror at this long and fascinating history What is the role of the car in our lives Should we be more skeptical of technology in our society In Women Behind the Wheel Nichols argues convincingly that only by understanding the many ways the car has changed us can we hope to prepare ourselves for this brave new era

Water and Food Security in the Face of Climate Change: Challenges and Opportunities for Resilience Salem Al-Naemi, **Build Your Own Electric Vehicle** Seth Leitman, Bob Brant, 2008-07-31 Go Green Go Electric Faster Cheaper More Reliable While Saving Energy and the Environment Empowering people with the tools to convert their own vehicles provides an immediate path away from petroleum dependence and should be part of the solutions portfolio Chelsea Sexton Co founder Plug In America and featured in Who Killed the Electric Car Create a superior driving experience strengthen America and restore the planet's ecosystems that's the promise of this book and it's well worth a read Josh Dorfman Founder Author The Lazy Environmentalist Your Guide to Easy Stylish Green Living This new updated edition of Build Your Own Electric Vehicle contains everything that made the first edition so popular while adding all the technological advances and new parts that are readily available on the market today Build Your Own Electric Vehicle gets on the expressway to a green ecologically sound cost effective way that even can look cool too This comprehensive how to goes through the process of transforming an internal combustion engine vehicle to electric or even building an EV from scratch for as much or even cheaper than purchasing a traditional car The book describes each component in detail motor battery controller charger and chassis and provides step by step instructions on how to put them all together Build Your Own Electric Vehicle Second Edition covers EV vs Combustible Engine Overview Environmental and Energy Savings EV Evolution since the First Electric Car Current Purchase and Conversion Costs Chassis and Design Today's Best Motors Battery Discharging Charging Styles Electrical Systems Licensing and Insurance Issues Driving Maintenance Related Clubs and Associations Additional Resources *Secondary Distribution Impacts of Residential Electric Vehicle Charging* Frank Lambert, 2000 **Automatic Charging System for Electric Vehicles**, 2000

Development and Implementation of an E-Vehicle Allocation Optimized System for Corporate Usage, 2019-03-20 Master's Thesis from the year 2018 in the subject Engineering Automotive Engineering Technical University of Munich language English abstract This thesis is an initial approach to analyze the design and implementation of an e vehicle sharing system in

the P3 Group office in Paris An overview of the electric vehicle charging infrastructure along with the relevant aspects of charging modes is provided A showcase of the analysis of different car sharing models within Europe is given after which a specific case study is analyzed in greater detail The parameters and features for the system were derived from a competitive benchmark of the car sharing models on the market today The objective was to assist the company in planning and managing a corporate e vehicle sharing system in a profitable way while offering the employees good quality service Therefore the cost of designing and installing the P3 EV charging station was evaluated On this matter empirical data was gathered from P3 employees to better understand their daily commute their needs and their expectations of the system An optimization model for distances cost and charging patterns was discussed and formalized as an integer linear program in MATLAB Given the complexity inherent to this optimization model stochastic distribution was employed to minimize the cost for the company taking into consideration the trips paid and the costs involved namely the personal wage of an employee A focus on the optimal design of an e vehicle sharing system was necessary while considering the problem's dimensionality number of vehicles parking places battery capacities etc and employee relocation time This study determines if the system provides higher net benefits to the company than available transportation alternatives As a result of this pricing comparison a significant reduction in total cost could be achieved for the company The data set conclusively supports the implementation of the e vehicle sharing system which provides a decreased cost versus the use of public transportation A possible avenue of future research is to extend the functionality of the developed model by adding a responsive user demand and possibly maximizing the car sharing ridership between employees
