Tomorrow's Global Community Jim Mann, 1998 Media marketing expert Jim Mann foresees the end of top heavy centralized bureaucracies in favor of global communities based upon the virtues of the family such as amiable decision making a balance of benefits and responsibilities concern about the welfare of all its members and sharing ideas freely The author predicts that the ever increasing volume and accessibility of information will eventually bring down some of the Western world's most entrenched paradigms in society culture and politics Tomorrow's global community will consist of a wide array of private partnerships eventually replacing the nation state The corporate and business shell will begin to atrophy as a new gift economy replaces it promising a free flow of information and knowledge rather than the adherence to a bottom line mentality centered about intellectual property rights and profit motives This optimistic view of the future is based upon events now occurring It may take many years for the new global community finally to emerge yet as more and more information creates uncertainty confusion and mistrust in central authority the sooner partnership networks will replace existing institutions

Hawkins, 1984 *The Stories We Live by* Dan P. McAdams, 1993 Who am I How do I fit in the world around me This revealing and innovative book demonstrates that each of us discovers what is true and meaningful in our lives and in ourselves through the creation of personal myths Challenging the traditional view that our personalities are formed by fixed unchanging characteristics or by predictable stages through which every individual travels *The Stories We Live By* persuasively argues that we are the stories we tell Informed by extensive scientific research yet highly readable engaging and accessible the book explores how understanding and revising our personal stories can open up new possibilities for our lives Religion and the American Future Christopher C. DeMuth, Yuval Levin, 2008 Religious belief is thriving in America today even though it seems under assault as seldom before attacked by secularists scientists and increasingly vocal atheists constrained by judges and civil libertarians mocked by contemporary artists and treated pragmatically if not cynically by politicians seeking votes This book explores the enduring strength of religion in American life Faith and religious observance are not obsolete or incompatible with modern society on the contrary the religious principles that guided the Founders continue to bind the nation and justify human endeavor In *Religion and the American Future* a distinguished group of scholars examine the future of religion in America Michael Novak John C Green Leon R Kass

Douglas W Kmiec Roger Kimball and Marcello Pera contemplate in turn the relationship of religion to the dominant secular realms of politics science law and art They argue that the religious and the secular realms should construct a mutual and productive understanding that faith based voting is not the threat it often seems that science cannot answer humanity s deepest moral inquiries and that the United States Constitution presupposes the existence of God The volume concludes with an instructive look at Europe and the troubling implications of turning away from religious belief altogether Religion and the American Future is a lively learned dialogue on the role of religion in American society The contributors raise their voices in opposition to the tide of cynicism and constraint that often overwhelms religion in public life and argue that tolerance respect and free expression must define the future of religion in America Book jacket
