I personally want to note the excellent work of Natalia and Marina specialists. I have applied several times with a request to place scripts on my site servipintura.com in certain places and links. Everything was done within 48 hours. A very personalized approach to me as a client. I recommend it to anyone who needs additional tools for their page on the Internet

Seminar paper from the year 2012 in the subject Communications Multimedia Internet New Technologies grade 1.0 University of Copenhagen Department of Media Cognition and Communication course Audience and User Studies language English abstract In September 2012 Facebook welcomed the one billionth user and can therefore be entitled as the current biggest social interaction platform worldwide With growing success since its launch in February 2004 questions about privacy security for user data became a growing issue as well With expanding user numbers these questions seem to become louder than ever During the years the Facebook has been on international focus for several privacy flaws for instance in 2005 for not encrypting users passwords in 2006 for publishing

every single friend activity without any restriction possibilities in a news feed on the personal start page or in 2007 the implementation of a platform for applications by third party suppliers In academic treatments about privacy made so far mainly Facebook itself was putted on the spot and accused of violating their user s privacy The social network giant was blamed to treat their user s privacy too carelessly and to make the matter worse Facebook became more and more commercial with personal data as currency The start of showing presence at the stock market in 2011 was just the logical consequence of this new company policy The two latest critic points Facebook needed to defend for were the standard settings for the privacy interface within the context of the new timeline optic and the latest change in Facebook privacy terms Both changes happened in 2012 After doing some first superficial research it seemed like there is no academic study so far that does not focus on Facebook as a company in charge regarding this matter But one could wonder if the users themselves are in charge as well Are we exhausting our options to protect our private data on Facebook While Facebook s privacy flaws are well examined relatively little literature is available on how much users know and care about these issues My assumption is that most of the users aren t doing much about the assumed lack of privacy beyond venting about it
