

Intermittent Fasting

Stage 1: Right After Eating

- Carbohydrates from food are converted into glucose (sugar) and released into the bloodstream.
- Blood sugar level rises.
- Insulin stimulates the conversion of glucose into glycogen as energy storage.

Stage 2: 3 Hours After Eating

- While insulin works, blood sugar level drops.
- In a non-fasting state, glycogen is used as energy.
- Excess glycogen that is not used is stored in the body as fats.

Stage 3: 9 Hours After Eating

- As blood sugar levels continue to drop, the body reacts by converting glycogen back into glucose and releasing it into the bloodstream.
- Fat is not yet used as an energy source, as there is still glucose and glycogen available.

Stage 4: 11 Hours After Eating

- Now that the stored glycogen has been almost used up, a metabolic switch is flipped.
- Fat is burned as it is used as energy.

Stage 5: 14-16 Hours After Eating

- As fat-burning continues, fatty acids are converted into ketones via ketosis.
- Ketones provide energy to the brain, heart and other vital organs.

Renowned cardiovascular research scientist and doctor of pharmacy Dr James DiNicolantonio partners with leading physician and bestselling author Dr Jason Fung to deliver *The Longevity Solution*, a groundbreaking new book that unlocks the secrets of healthy aging. It investigates the dietary habits and other practices of the healthiest, longest-lived humans on the planet who live in regions known as Blue Zones as a model for what and how we should eat. It teaches the benefits of intermittent fasting and calorie restriction, which have been shown to slow the aging process while consuming proper ratios of protein and healthy fats. It also looks at how red wine, tea, and coffee play key roles in optimizing health and why salt is an ally, not an enemy, in the longevity equation. In this comprehensive guide, Dr DiNicolantonio and Dr Fung unveil cutting-edge science in an approachable format that is easy to understand and can be put into practice immediately. Simple dietary changes can help you break the cycle of carbohydrate dependence, kick your metabolism into high gear, and jump start your longevity genes. *The Longevity Solution* puts healthy aging back in your control.
