Transdisciplinary Approaches to Learning Outcomes in Higher Education Kumar, Rajendra, Ong, Eng Tek, Anggoro, Subuh, Toh, Tin Lam, 2024-08-05 The isolated nature of academic disciplines restricts the potential for collaborative problem solving and innovative approaches to teaching and learning. This fragmentation limits the effectiveness of educational outcomes and fails to prepare students for the multidimensional demands of the modern world. To address this pressing issue, *Transdisciplinary Approaches to Learning Outcomes in Higher Education* provides a comprehensive framework for transdisciplinary research in higher education. This book offers a systematic approach to transdisciplinary research and equips researchers, educators, and policymakers with the tools needed to break down disciplinary barriers and foster interdisciplinary collaboration. Through a series of case studies, theoretical frameworks, and practical guidelines, the book demonstrates how transdisciplinary approaches can lead to more effective teaching practices, curriculum design, and student engagement. It highlights the importance of integrating digital transformation, creativity, communication skills, and information technology tools to enhance learning outcomes in higher education. **More**

Everything Forever Adam Becker, 2025-04-22 The bad science and sinister ideas behind Silicon Valley's foolish obsession with immortality, AI paradise, and limitless growth. Tech billionaires have decided that they should determine our futures for us. According to Elon Musk, Jeff Bezos, Sam Altman, and more, the only good future for humanity is one powered by technology: trillions of humans living in space, functionally immortal, served by superintelligent AIs. In *More Everything Forever*, scientist and writer Adam Becker investigates these wildly implausible and often profoundly immoral visions of tomorrow to reveal why, in reality, there is no good evidence that they will or should come to pass. The giants of Silicon Valley claim that their ideas are based on science, but the truth is darker: they come from a jumbled mix of shallow futurism and racist pseudoscience. And behind these fanciful visions of space colonies and digital immortality is a cynical power grab at the expense of essential work spent on solving real problems like the climate crisis. *More Everything Forever* exposes the

powerful myths that dominate Silicon Valley challenging us to see how foolish and dangerous these visions of the future are

The American Legion, 2001 **Feeding the Machine** Callum Cant, James Muldoon, Mark Graham, 2024-08-06 For readers of Naomi Klein and Nicole Perlroth, a myth dissolving exposé of how artificial intelligence exploits human labor and a resounding argument for a more equitable digital future. Silicon Valley has sold us the illusion that artificial intelligence is a frictionless technology that will bring wealth and prosperity to humanity. But hidden beneath this smooth surface lies the grim reality of a precarious global workforce of millions laboring under often appalling conditions to make AI possible. This book presents an urgent, riveting investigation of the intricate network that maintains this exploitative system, revealing the untold truth of AI. Based on hundreds of interviews and thousands of hours of fieldwork over more than a decade, *Feeding the Machine* describes the lives of the workers deliberately concealed from view and the power structures that determine their future. It gives voice to the people

whom A I exploits from accomplished writers and artists to the armies of data annotators content moderators and warehouse workers revealing how their dangerous low paid labor is connected to longer histories of gendered racialized and colonial exploitation A I is an extraction machine that feeds off humanity s collective effort and intelligence churning through ever larger datasets to power its algorithms This book is a call to arms that details what we need to do to fight for a more just digital future

Leadership 2.0 in processes of a sustainable change Prof. Dr. Michael Kurwan, 2025-06-30 Document from the year 2025 in the subject Leadership and Human Resources Leadership language English abstract In order to successfully implement sustainable changes in a company in the context of change processes strong leadership is required at the top of a company which should have a great deal of empathy and a sure instinct in order to position the company in the market in the long term and profitably In order to successfully shape these sustainable changes it will not be the famous power of the leader of the past but will only work with the involvement of employees in the new world of work in the knowledge age which is characterized by digitalization and artificial intelligence This new form of leadership is also referred to as Leadership 2 0 in which it is important to retain top performers and in particular key personnel in the company in the long term which is a very challenging leadership task in HR management In change processes a fundamental distinction must be made between incremental change management and radical change management While incremental change takes place continuously and is integrated into everyday working life radical change represents a strategic realignment of the company which is largely associated with staff reductions and is intended to change the corporate culture This is particularly true in the case of restructuring where cost cutting programs play a decisive role in ensuring the long term survival of the company Employees are more willing to go along with incremental change also known as continuous improvement than radical change as they could also be affected by staff cuts This fuels employees fears and therefore often leads to high staff turnover
